Reasoning in Quantum Theory Maria Luisa Dalla Chiara, Roberto Giuntini, Richard Greechie, 2004-03-31 Is quantum logic really logic This book argues for a positive answer to this question once and for all There are many quantum logics and their structures are delightfully varied The most radical aspect of quantum reasoning is reflected in unsharp quantum logics a special heterodox branch of fuzzy thinking For the first time the whole story of Quantum Logic is told from its beginnings to the most recent logical investigations of various types of quantum phenomena including quantum computation Reasoning in Quantum Theory is designed for logicians yet amenable to advanced graduate students and researchers of other disciplines

Purity, Spectra and Localisation Mike Prest, 2009-06-04 It is possible to associate a topological space to the category of modules over any ring This space the Ziegler spectrum is based on the indecomposable pure injective modules Although the Ziegler spectrum arose within the model theory of modules and plays a central role in that subject this book concentrates specifically on its algebraic aspects and uses The central aim is to understand modules and the categories they form through associated structures and dimensions which reflect the complexity of these and similar categories The structures and dimensions considered arise particularly through

the application of model theoretic and functor category ideas and methods Purity and associated notions are central
