Dynamic Wap Application Development:

Dynamic WAP Application Development Soo Mee Foo, Christopher Hoover, Wei Meng Lee, 2001 This guide to building dynamic Web sites for wireless Web browsing introduces the WAP Wireless Application Program and offers in depth explanation of HDML and WML languages Includes an overview of Microsoft ASP and Java Servlets that guides developers through the process of creating WAP applications using server side technologies Illustrations **DYNAMIC WAP APPLICATION DEVELOPMENT SOO MEE FOO** □, 2002-04-20 **Pro Single Page Application Development** Gil Fink, Ido Flatow, SELA Group, 2014-05-10 One of the most important and exciting trends in web development in recent years is the move towards single page applications or SPAs Instead of clicking through hyperlinks and waiting for each page to load the user loads a site once and all the interactivity is handled fluidly by a rich JavaScript front end If you come from a background in ASP NET development you ll be used to handling most interactions on the server side Pro Single Page Application Development will guide you through your transition to this powerful new application type The book starts in Part I by laying the groundwork for SPA development You ll master some JavaScript techniques that will come in useful later on and get to know the building blocks of a single page application including modules routing and MV frameworks In Part II you ll build the client for your application This is where the magic happens as the authors take you through the process step by step Backbone js is the ideal library for demonstrating SPA development in practice but you can apply the same principles with other frameworks in your future applications Part III takes you through the process of building the server side of your application using ASP NET Web API and hooking up the two parts of your application to create a working whole SPA development also comes with its own particular challenges including tracking history user interface performance and how to handle search engine optimization In the final chapters the authors guide you through some of these issues and advanced techniques and finish by showing you how to deploy your application As SPAs become the de facto standard of web application development the in depth Pro Single Page Application Development will be your one stop shop for creating fluid modern applications on the web *Dreamweaver MX Application Development in 21 Days* John Ray, 2002 Sams Teach Yourself Dreamweaver X in 21 Days teaches the reader all the skills needed to learn how to effectively develop database driven Web applications with Macromedia Dreamweaver X The tutorial approach aids the reader in learning the basics quickly and then moves on to the more advanced features and concepts By the end of the 21 days the reader will know how to create Web sites with dynamic content develop a browser based sales and inventory management system create a discussion forum develop a complete e commerce solution write custom validations and extend functionality with JavaScript design enhanced navigation of the Web site and make an informed decision as to which server platform is the right one for the project at hand *Advances in Software Engineering* Changhoon Lee, 2009-11-02 As software engineering SE becomes specialized and fragmented it is easy to lose sight that many topics in SE have common threads and because of this advances

in one sub discipline may transmit to another The presentation of results between different sub disciplines of SE encourages this interchange for the advancement of SE as a whole Of particular interest is the hybrid approach of combining ideas from one discipline with those of another to achieve a result that is more significant than the sum of the individual parts Through this hybrid philosophy a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline This volume comprises the selection of extended versions of papers that were presented in their shortened form at the 2008 International Conference on Advanced Software Engineering and Its Applications <http://www.sersc.org/ASEA2008> and 2009 Advanced Science and Technology <http://www.sersc.org/AST2009> We would like to acknowledge the great effort of all in the ASEA 2008 and AST 2009 International Advisory Board and members of the International Program Committee as well as all the organizations and individuals who supported the idea of publishing these advances in software engineering including SERSC <http://www.sersc.org> and Springer We would like to give special thanks to Roslin John Robles Maricel O Balitanas Farkhod Alisherov Alisherovish Feruza Sattarova Yusufvna These graduate school students of Hannam University attended to the editing process of this volume with great passion
