## **Comparative Competition Policy:**

*Comparative Competition Law and Economics* Roger J. Van den Bergh, 2017-09-29 Offering a concise and critical comparison of EU competition law and US antitrust law from an economic perspective this is the ideal textbook for international and interdisciplinary courses combining law and economic approaches **Comparative Competition Law** John Duns, Arlen Duke, Brendan Sweeney, 2015-11-27 *Comparative Competition Law* examines the key global issues facing competition law and policy This volume s specially commissioned chapters by leading writers from the United States Europe Asia South America and Australia provide a synthesis of how these current issues are addressed by drawing on the approaches taken in different jurisdictions around the world Expert contributors examine the regulation of core competitive conduct by comparing substantive law approaches in the US and the EU The book then explores issues of enforcement such as the regulator s powers whether to criminalize anti competitive conduct the degree to which private enforcement ought to be encouraged and the extraterritorial scope of domestic laws Finally the book discusses how competition law is being implemented in a variety of countries including Japan China Brazil Chile and Colombia This scholarly analysis of the key substantive procedural and remedial challenges facing global competition law policymakers offers a comparative framework to facilitate a better understanding of relevant policies This collection of global perspectives will be of great interest to scholars and students of competition law microeconomics and regulatory studies Competition law regulators policy makers and law practitioners will also find this book an invaluable resource **Comparative Competition Policy** G. Bruce Doern, Stephen Wilks, 1996 This book provides definitive and in some cases unique studies of the six model regimes of the USA Germany Japan the United Kingdom and the European Union Each chapter is written by eminent country specialists is based on original research and is up to date The comparative dimension is presented in explicit introductory and concluding chapters but the comparison is also set in the context of the globalization of economic activity and the internationalization of policy **Comparative Competition Policy** Susan Beth Farmer, 2020 Pr sentation de l diteur This essential two volume collection presents leading articles covering the breadth of comparative competition law The set comprehensively examines the theories behind competition the issues surrounding the abuse of dominance or monopolization and the vertical restraints of trade as well as cartels non cartels and mergers along with an insight into practice and procedures Together with an original introduction by the editor the articles in this collection provide an invaluable window into scholarly and professional reflection on this diverse subject **International and Comparative Competition Law** Maher M. Dabbah, 2010-09-16 This thorough appraisal of competition law and policy from an international and comparative perspective covers the role of different international organisations active in the area the significance of multinational enterprises and in particular the differences between US and EU systems Taking examples from regions such as Africa the Middle East and Asia Maher M Dabbah looks at the law and policy in developing countries and at a regional level the internationalisation of competition law

and the doctrines of extraterritoriality bilateral cooperation and multilateral cooperation as well as the relationship between competition and trade policy The book should prove useful to anyone who is interested in gaining an insight into the international dimension of competition law and policy It is written in a language and style which make such a complex topic both possible to understand and enjoyable *Competition Law* Eugène Buttigieg,2009-01-01 Although it is commonly assumed that consumers benefit from the application of competition law this is not necessarily always the case Economic efficiency is paramount thus competition law in Europe and antitrust law in the United States are designed primarily to protect business competitors and in Europe to promote market integration and it is only incidentally that such law may also serve to protect consumers That is the essential starting point of this penetrating critique The author explores the extent to which US antitrust law and EC competition law adequately safeguard consumer interests Specifically he shows how the two jurisdictions have gone about evaluating collusive practices abusive conduct by dominant firms and merger activity and how the policies thus formed have impacted upon the promotion of consumer interests He argues that unless consumer interests are directly and specifically addressed in the assessment process maximization of consumer welfare is not sufficiently achieved Using rigorous analysis he develops legal arguments that can accomplish such goals as the following replace the economic theory of consumer welfare with a principle of consumer well being build consumer benefits into specific areas of competition policy assess competition cases so that income distribution effects are more beneficial to consumers and control mergers in such a way that efficiencies are passed directly to consumers The author argues that in the last analysis the promotion of consumer well being should be the sole or at least the primary goal of any antitrust regime Lawyers and scholars interested in the application and development and reform of competition law and policy will welcome this book They will find not only a fresh approach to interpretation and practice in their field comparing and contrasting two major systems of competition law but also an extremely lucid analysis of the various economic arguments used to highlight the consumer welfare enhancing or welfare reducing effects of business practices *Comparative Competition Policy* S. R. M. Wilks,John Anthony Usher,Economic and Social Research Council, *Comparative Competition Law* Thomas Weck,Masako Wakui,2023-12-04 This book provides a comparative overview of the rules of EU US and Japanese law on competition After an overview of their history and the underlying economic issues it compares perspectives on cartels and other agreements restraining competition ancillary agreements R single firm conduct abuse of dominant market power monopolization general procedural law and merger control and state measures such as regulation and subsidies In each case the presentation of the legal system is supplemented by examples from the case law With a focus on the protection of competition in digital markets new regulatory approaches e g the EU Digital Markets Act and comparable US regulatory initiatives are evaluated and current legal developments in other jurisdictions are addressed **Competition Law and Antitrust** David J. Gerber,2020-08-28 Competition or Antitrust law is now a global phenomenon It operates in more than 100 countries and the

relationships among competition law systems are often complex and opaque Competition law is also new to many countries which creates uncertainty about how decisions will be made in these jurisdictions This makes it critically important to understand both the similarities and differences among the systems and the relationships between them A succinct introduction this title breaks down the complicated and foreboding topic of competition law Divided into four parts this book covers the elements of competition laws its decisions targets and globalization and the future of competition law It also provides global context by looking at competition law in the US Europe and growing markets like Asia and Latin America This title covers the most pressing issues of competition law in an informative and concise way Drawing on his lifetime of global experience and research David J Gerber's *Competition Law and Antitrust* is an essential tool for anyone interested in competition or antitrust law [Rediscovering Competition](#) Roland Sturm, Jürgen Dieringer, Markus M. Müller, 2013-12-11 The volume consists of two parts First in two contributions the basics of the debate on regulatory policy in Germany and Great Britain are presented In a second step academics from Political Science Economics and Law as well as decision makers from Poland the Czech Republic Slovakia and Hungary discuss competition law institutional aspects of competition control offices and regulatory policy in East Central Europe with an additional focus on transport The contributions of the decision makers should be considered as insider reports *European Competition Law and Economics* Roger van den Bergh, Peter D. Camesasca, 2001 The aim of this book is to explore the economic fundamentals of European competition law

**International and Comparative Competition Laws and Policies** Yang-Ching Chao, 2001-10-17 Proceedings of a conference sponsored by the Fair Trade Commission of the Republic of China [International And Comparative Competition Laws And Policies](#) Yang-Ching Chao, Gee San, Chagfa Lo, Jiming Ho, 2007-01-01 Competition policy is today in the process of adoption in dozens of nations worldwide at a time when competition laws have necessarily become applicable to such new fields as trade investment intellectual property rights information technology and global consumer protection Although vigorous enforcement remains the most serious challenge to global success it is also important to recognize that the established American European model of competition policy may not be the right thing for countries with radically different cultural traditions especially less developed countries This timely and valuable book explores the prospects for competition policy its likely development and its ever more central role in the world trade regime With this book interested parties everywhere may benefit from the insightful perspectives of outstanding scholars and policymakers representing Asia Pacific Europe and North and South America **Competition Policy as a Dimension of Economic Policy** Robert D. Anderson, S. Dev Khosla, Canada. Industry Canada, 1995 This paper examines the relationship between competition policy and wider economic policy objectives relating to industrial restructuring and international competitiveness While the primary focus is on Canada the paper also discusses the competition law and policy regimes of other major industrialized economies In addition to existing policies the paper considers a number of issues relating to the future role of competition policy in the

globalizing economy of the 1990s The paper has seven parts competition policy in a globalizing era key features of competition policy in Canada the links between competition policy and other economic policies competition policy in foreign jurisdictions and issues relating to the future evolution of competition policy in Canada **Book Review** David J. Gerber,2013 It is not surprising that scholarship relating to competition law especially its comparative and international dimensions has been dominated by scholars based in either law or economics As obviously important as these two perspectives are however they are by themselves often too narrow to illuminate important aspects of the operation of competition law systems Professors Bruce Doern and Stephen Wilks have tackled this deficit bringing the perspectives and methodologies of political science to bear on global competition law issues The volume of essays they have edited is a welcome and valuable step toward expanding the horizons of competition law and increasing our understanding of how competition law systems operate *Comparative Competition Policy* G. Bruce Doern,2011 **Harmonisation of EU Competition Law Enforcement** Jurgita Malinauskaitė,2019-11-15 This book explores how the EU s enforcement of competition law has moved from centralisation to decentralisation over the years with the National Competition Authorities embracing more enforcement powers At the same time harmonisation has been employed as a solution to ensure that the enforcement of EU competition rules is not weakened and the internal market remains a level playing field While employing a comparative law argument the book accordingly analyses the need for harmonisation throughout the different stages of development of the EU s competition law enforcement save Merger control and State Aid the underlying rationale and the extent to which comparative studies have been undertaken to facilitate the harmonisation process from an historical perspective It also covers the Directives such as the Antitrust Damages Directive and the ECN Directive Investigating both public and private enforcement it also examines the travaux préparatoires for the enforcement legislation in order to discover the drafters intent The book addresses the European and the Member States perspectives namely the Central and Eastern European CEE countries as harmonisation proceeds through dialogue and cooperation between the two levels Lastly it explores the extent to which harmonisation of the competition law enforcement framework has been accepted and implemented in the Member States legal systems or has led to the fragmentation of the national systems of the CEE countries *Intl Comparative Competition Law* ,2010 This thorough appraisal of competition law and policy from an international and comparative perspective covers the role of different international organisations active in the area the significance of multinational enterprises and in particular the differences between US and EU systems Taking examples from regions such as Africa the Middle East and Asia Maher M Dabbah looks at the law and policy in developing countries and at a regional level the internationalisation of competition law and the doctrines of extraterritoriality bilateral cooperation and multilateral cooperation as well as the relationship between competition and trade policy The book should prove useful to anyone who is interested in gaining an insight into the international dimension of competition law and policy It is written in a

language and style which make such a complex topic both possible to understand and enjoyable *International Arbitration*
