Continuing Professional Development - Preparing for New Roles in Libraries: A Voyage of Discovery Paul Genoni, Graham Walton, 2006-05-02. Librarians and information workers the world over are faced with the constant challenge of remaining abreast of developments in their field. Rapid changes in technology and workplace roles threaten to make their skills obsolete unless they undertake constant professional development. This international collection presents a comprehensive overview of current continuing professional development theory and practice for those who manage and work in library and information services. Papers by academics and practitioners describe numerous innovative responses to emerging continuing education and training needs, including workplace learning, individual learning, and learning organisations.

A Strategic Guide to Continuing Professional Development for Health and Care Professionals: The TRAMM Model Sarah Lawson, Deb Hearle, 2020-09-11. This thoroughly revised edition of the popular Strategic Guide to Continuing Professional Development for Health and Care Professionals includes the latest professional policy guidance updates as well as the results of the authors' ongoing research into professional development within health and social care. The importance of applying new learning in practice is reflected by the updated TRAMM model, in which 'A' now stands for 'Apply' rather than 'Activity' as in the first edition. There is a new chapter on changing mindsets about CPD and how to create opportunities for learning and development despite limited resources in the current economic climate. The authors have also expanded the chapter on CPD engagement with updated evidence on exploring your preferred styles of learning.

Continuing professional development (CPD) is essential for all health and social care professionals. It is also beneficial for organisations. Evidence shows that when there is significant investment in CPD, individuals feel valued and their practice improves. In order to maximise the potential of your CPD, this practical handbook guides you through the updated five TRAMM stages or stations: Tell, T Record, R Apply, A Monitor, M and measure. The tried and tested TRAMM Model reflects the five standards for CPD laid down by the Health and Care Professions Council, and your own learning needs provide the main focus, enabling you to develop a full CPD portfolio as you progress. At the end of each chapter, there are opportunities to reflect on your learning and apply theory to practice through a series of tasks. Designed for all levels, from health and social care students to experienced practitioners, this book may also be useful for associated support workers and other healthcare professionals, including doctors, pharmacists, optometrists, nurses, and midwives. In addition, some aspects will be relevant for professionals outside healthcare, such as teachers, surveyors, and engineers.

Planning Continuing Professional Development Frankie Todd, 2020-04-23. Continuing professional development

CPD aims to maintain or improve the quality of professional performance. So far it tends to have been designed for specific professional groups such as teachers, doctors, architects or engineers. Approaches as a result have often been local, separatist or idiosyncratic in nature. This book, first published in 1987, argues that CPD designers should consider strategies used for professional groups other than their own. This title will be useful to anyone with a responsibility for developing and implementing courses and also to practitioners themselves as well as to students of business studies.

Continuing Professional Development and Lifelong Learning Greg J. Neimeyer, Jennifer M. Taylor, 2012. Through a variety of diverse perspectives the authors delve into critical issues related to lifelong learning and professional development and invite the reader to consider the roles and functions of continuing professional development, the problems and prospects associated with mandating it and the continuing quest to translate effective learning into competent practice that is dedicated to the welfare of the consumer on the one hand and the generation of improved outcomes at the other. Interested readers will range from current consumers to trenchant critics of the current health care system. Anyone interested in improving health care services and developing best practices will find ample food for thought in the pages of this book that can be applied to better evaluating and facilitating ongoing professional competence and health care outcomes.

Effective Practices in Continuing Professional Development Peter Earley, Vivienne Porritt, 2009. Effective Practices in Continuing Professional Development presents case studies of schools' journeys towards effective CPD practice as part of a TDA national project. It tells the story of the goals set and achieved and the challenges and successes along the way. Each case study makes specific reference to the nine factors or approaches to CPD identified in the book as underpinning effective practice. This includes how a clarity of purpose was established at the outset of CPD activity and how the London Centre for Leadership in Learning's clear and rigorous impact evaluation framework supported and challenged projects to develop their thinking and practice. All of this is contextualised within the wider literature about the successful leadership of CPD and the effective practice of school workforce development. The editors introduce why effective CPD matters and conclude with the lessons learnt and ways forward. Among the many cases provided by leaders in this field, Sara Bubb writes how coaching in a special school was used to make teachers and support staff feel more valued. John Tandy describes how primary school heads came together with the Local Authority to jointly develop a Leadership Charter that was a summary of effective leadership practice in the Borough. The book will interest practitioners and professionals who design and develop CPD opportunities and practice within all sectors of education as well as all working within the strategic leadership of CPD. It also complements the TDA's national development programme for the leadership of CPD by showing how the strategic implications of the nine CPD approaches identified can improve the overall quality and impact of professional development and so enhance the learning for all children and young people.
