Edwards,1990 **Metaphysics** Stephan Körner,1984-09-06 This is an ambitious and substantial study of metaphysics its nature and inescapability Professor Körner's method may be described as philosophical anthropology and aims to arrive at a characterisation of the metaphysical beliefs with which we have to operate Professor Körner begins by describing how the categorical framework of a person's metaphysical beliefs may be embedded in more ordinary beliefs and practical attitudes to the world He illustrates the variety of such frameworks and describes their role going on to explain how they may be modified by argument and reflection This is an independent inquiry but also the culmination of a series of Professor Körner's earlier works The writing is extremely clear and the material sensitively controlled revealing great learning and many suggestive insights and comparisons It presents overall a comprehensive and carefully thought out account of metaphysics

Kant and Modern Political Philosophy Katrin Flikschuh,2000-08-28 In this book Katrin Flikschuh examines the relevance of Kant's political thought to major issues and problems in contemporary political philosophy She advances and defends two principal claims that Kant's philosophy of Right endorses the role of metaphysics in political thinking in contrast to its generally hostile reception in the field today and that his account of political obligation is cosmopolitan in its inception assigning priority to the global rather than the domestic context She shows how Kant's metaphysics of freedom as a shared idea of practical reason underlies the cosmopolitan scope of his theory of justice and she concludes that despite the revival of Kantianism in contemporary thinking his account of justice is in many respects very different from dominant approaches in contemporary liberal theory Her study will be of interest to political philosophers political theorists and historians of ideas
