Children's Discourse:

Children's Discourse Maya Hickmann, 2002-11-21 This comparative study explores two central questions in the study of first language acquisition: What is the relative impact of structural and functional determinants? What is universal versus language specific during development? Maya Hickmann addresses these questions in three domains of child language: reference to entities, the representation of space, and uses of temporal aspectual markings. She provides a thorough review of different theoretical approaches to language acquisition and a wide range of developmental research, as well as examining all three domains in English, French, German, and Chinese narratives. Hickmann's findings concern the rhythm of acquisition, the interplay among different factors (syntactic, semantic, pragmatic) determining children's uses, and universal versus variable aspects of acquisition. Her conclusions stress the importance of relating sentence and discourse determinants of acquisition in a crosslinguistic perspective. *Children's Discourse* will be welcomed by those working in psychology and language-related disciplines interested in first language acquisition.

Children's Language Keith E. Nelson, 2014 *Children's Language* Keith E. Nelson, Ayhan Aksu-Koç, Carolyn E. Johnson, Ayhan Aksu-Koc, 2014-04-04 These volumes present coherent sets of papers developed along two of the thematic lines that underscored the program of the meeting of the International Association for the Study of Child Language in Istanbul in the summer of 1996. Thoroughly reviewed and updated to reflect the state of child language research and theory, particularly in the domains of discourse and interaction, they convey not only the flavor of that meeting but some of the most exciting trends in the field today. Each contribution in Volume 10, *Developing Narrative and Discourse Competence*, focuses on the differential effects of discourse genres, elicitation techniques, communicative contexts, literacy, and schooling, and the oft-cited variables of age, language, and culture. Issues concerning the interrelations between social, cognitive, and affective capacities and processes in discourse are addressed. Each chapter raises theoretical questions regarding how and when representations are constructed to support new complexities. Presenting data from a cross-cultural and cross-linguistic perspective, this volume highlights both the particulars and the universals of the processes involved. The chapters in Volume 11, *Interactional Contributions to Language Development*, address issues including scaffolding of processing and learning in particular interactional sequences, linkages among interpersonal functions or relations, cognitive development, and semantic, syntactic, and pragmatic devices or forms, and models of how interactions proceed: input is selected and learning advances across multiple rounds of interaction. Each of these volumes will be a valuable addition to the libraries of all who study the development of language.

Discourse Approaches to Gender-Based Violence Laura Mercé, Sergio Maruenda-Bataller, 2026-03-23 This volume illustrates how the adoption of discourse approaches can cast light on the complex and often subtle ways in which gender based violence GBV discursively operates The focus is on careful theorisations and empirical contributions that foreground GVB as a human rights violation motivated by the gender of the targeted community The chapters are premised on the belief that the hierarchical social arrangements that are inherent to GVB are symbolically realised through language use While resonating with previous feminist discourse scholarship the book explicitly focuses on the theme of GVB It intends to be a valuable resource for language and gender researchers and for organisations willing to prevent and respond to GVB

child development While the papers in this issue seem diverse in terms of topic and discipline there are a number of common themes critical period for brain development and the importance of specific environmental input during this period importance of early brain development and enriched environments is supported in articles describing findings from human studies potential for brain plasticity following specialized retraining is found in a compelling paper demonstrating different profiles of brain activation for normal readers vs those who have dyslexia and younger children at high risk for development of reading disabilities and critical period brain plasticity and parallel changes in developing behavior and brain structure and functioning As a number of papers in this issue describe potential interventions one is relevant because it describes the numerous factors that make results of such studies have the potential to generalize to larger populations Putting the described papers in a broad perspective the last article argues that we cannot understand the health status of a society without understanding the health determining influences across the life course *Children's Play, Pretense, and Story* Susan Douglas, Lesley Stirling, 2015-12-21 At the heart of this volume is the recognition that children's engagement with play and story are intrinsically and intricately linked The contributing authors share a passionate interest in the development and well being of children in particular through their use of imagination and adaptation of the everyday into play and stories Following these principles the volume explores the connections between play story and pretense with regard to many cultural and contextual factors that influence the way these elements vary in children's lives In a departure from earlier collections on play and story the authors take a particular focus on normative as compared with atypical development This collection begins with an approach to understanding the developmental relationship between play and story which recognizes their similarities while acknowledging their differences Much of the collection addresses pretend play and story in children with autism spectrum disorder an understudied but important group for consideration as these dimensions of their lives and development have often been considered problematic The volume also includes sections on play and story in classroom settings and play and story across cultures including non English speaking environments such as Israel Romania China and Mexico It concludes with a discussion of how play differs across sociocultural and economic contexts making a unifying claim for the importance of play in children's lives but also calling for an understanding of what play means to very different groups of children **The Development of Children's Discourse Skills in Argument Text** Angela Mary Ardington, 1996 Expository Discourse in Children, Adolescents, and Adults Marilyn A. Nippold, Cheryl M. Scott, 2013-03-07 School success in the 21st century requires proficiency with expository discourse the use and understanding of informative language in spoken and written modalities This occurs for example when high school students read their textbooks and listen to their teachers lectures and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations Although many students are proficient with the expository genre others struggle to meet these expectations This book is designed to provide information on the use and understanding of expository

discourse in school age children adolescents and young adults Recently researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders Although many books have addressed the development of conversational and narrative discourse by comparison books devoted to the topic of expository discourse are sparse This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders It will be of interest to a range of professionals including speech language pathologists teachers linguists and psychologists who are concerned with language development and disorders
