Childs Conception Of Numbers:

The Child's Conception of Number Jean Piaget,1997 First published in 1997 Routledge is an imprint of Taylor Francis an informa company

The Child's Conception of Number Jean Piaget,1952 Professor Piaget discusses a set of investigations he and a team of co workers carried out on the genesis of the notion of number in the child s mind By asking questions freely they were able to gather valuable statements from children about the actions they were asked to perform with experimental objects Beginning with the hypothesis that the construction of number goes hand in hand with the development of logic the research team set out to diagnose developing number relevant capabilities more basic than those involved in counting and routine primary school number work The aim was to study the essential properties of the number system and the underlying assumptions which adults make about the behavior of numbers The first experiments dealt with the child s ability to grasp the ideas of conservation of quantity and conservation of number These led to investigations on the ability to coordinate corresponding sets and a study of the cardinal and ordinal aspects of numbers and their interrelationships The final experiments dealt with the child s growing awareness of basic additive and multiplicative properties of numbers Piaget sees classes relations and numbers as cognitive domains which develop in an intertwined mutually dependent way From these experiments he concludes that number is organized stage after stage in close connection with the gradual elaboration of systems of inclusions hierarchy of logical classes and systems of asymmetrical relations qualitative seriations the sequence of numbers thus resulting from an operational synthesis of classification and seriation

[The Child's Conception of Number](#) Jean Piaget,2003-01 *The Child's Conception of Number* ,1969 **Child's Conception of Number** Jean Piaget,C. Gattegno,F.M. Hodgson,2013-07-04 First published in 1997 This is Volume II of selected works of Jean Piaget which looks at his thinking on children and how their interaction and perception of number touching on the areas of development in thinking on conversation of quantities and invariance of wholes cardinal and ordinal one one correspondence as well as additive and multicitative compositions These explorations look into tracing the development of the operations which give rise to number and continuous quantities to space time speed etc operations which in these essential fields lead from intuitive and egocentric pre logic to rational co ordination that is both deductive and inductive
