DATA STRUCTURE

➡ Data structure is a systematic way to organize data in order to use it efficiently.

➡ There are many ways of organizing the data in memory like array stores the elements in a continuous manner.

➡ The data structure is not any programming language like C, C++, Java etc. It is a programming language that we can use in any programming language to structure the data in the memory.

➡ To structure data, we need a set of algorithms known as Abstract data type. These are a set of rules.

➡ Following are the terms of data structure:

● Interface

INTERFACE

➡ Interface represents set of operations that a data structure supports.

➡ An interface only provides the list of supported operations, types of parameters they can accept & return type of these operations.
