Affinity Membranes

Ankdrew Parvel, Andy Wu

Affinity Membranes:

Affinity Membranes Elias Klein,1991-02-14 Explores the latest findings for both selective and efficient separation devices in the field of kidney research It is divided into three major sections Part one deals with the biochemistry part of the problem including how to identify ligands of interest how to link them to synthetic membranes and some kinetic limitations of frontal elution chromatography The second part comprehensively discusses the various substrata used in affinity separations and the formation processes of semi permeable membranes The final section explores the filtration processes using membranes and the kinetics of separations based on affinity membranes

Membrane Processes in Separation and Purification J.G.

Crespo,Karl W. Bøddeker,1994-06-30 The current vigour in separations research principally derives from the need for pioneering separations processes in an emerging technology biotechnology from new societal emphases reduction of chemical emissions into the environment as well as from opportunities for achieving dramatic improvements in the efficiency of a number of manufacturing technologies through the development of a new generation of membranes novel membrane applications Accordingly the contributions to this volume are grouped into Membranes in Biotechnology 11 papers Membranes in Environmental Technology 6 papers and New Concepts 4 papers This is followed by one contribution each on Energy Requirements and Education i e membrane processes within an academic curriculum The book thus amounts to a state of the art review of applied membrane processes Even though other texts have appeared in recent years a more documented practical book is needed with a strong interaction with the collateral disciplines of materials sciences life sciences and environmental science This book emphasizes the need for such an integrated approach to membrane processes

Handbook of Membrane Separations Anil K. Pabby,Syed S.H. Rizvi,Ana Maria Sastre Requena,2008-07-07 The Handbook of Membrane Separations Chemical Pharmaceutical and Biotechnological Applications provides detailed information on membrane separation technologies as they have evolved over the past decades To provide a basic understanding of membrane technology this book documents the developments dealing with these technologies It explores chemical pharmaceutical food processing and biotechnological applications of membrane processes ranging from selective separation to solvent and material recovery This text also presents in depth knowledge of membrane separation mechanisms transport models membrane permeability computations membrane types and modules as well as membrane reactors

Integrated Membrane Systems and Processes Angelo Basile,Catherine Charcosset,2016-01-26

The book examines the possibility of integrating different membrane unit operations microfiltration ultrafiltration nanofiltration reverse osmosis electro dialysis and gas separation in the same industrial cycle or in combination with conventional separation systems It gives careful analysis of the technical aspects and the possible fields of industrial development The book reviews many original solutions in water desalination agro food productions and wastewater treatments highlighting the advantages achievable in terms of product quality compactness rationalization and optimization of productive cycles reduction of environmental impact and

energy saving Also included are examples of membrane reactors and their integration with a fuel cell polymeric membranes in the integrated gasification combined cycle power plants integrating a membrane reformer into a solar system and potential application of membrane integrated systems in the fusion reactor fuel cycle With detailed analysis and broad coverage the book is divided into two sections Bio applications and Inorganic Applications *Advanced Measurement and Test IV* Ankdrw Parvel,Andy Wu,2015-01-12 Selected peer reviewed papers from the 2014 4th International Conference on Advanced Measurement and Test AMT 2014 November 1 2 2014 Wuhan China *Polymer Grafting and Crosslinking* Amit Bhattacharya,James W. Rawlins,Paramita Ray,2008-12-01 Rapid advances in technology require materials with improved property profiles Polymer modification using grafting and crosslinking are key ways to achieve this in an economical way and without the need for developing new materials Often widely disparate and in a number of references practical information on polymer grafting and crosslinking is now available in one volume Researchers seeking information that bridges the knowledge gap between the scientific principles and industrial applications of polymer crosslinking and grafting will find coverage on the basic science the methodologies and a focus on the specific techniques used in a variety of industrial applications such as automotive laminates paints adhesives and cable Coverage also includes potential biomedical applications Descriptions of analytical tools that can be used to evaluate the results are also included **Selectivity of Affinity Membranes for Immunoglobulin Capture** Cristiana Boi,2006 **Evaluation of an Ion Exchange Membrane for Mass Transfer Limitations During Protein Purification** Chetan S. Rao,1998 Normal and Abnormal Red Cell Membranes ICN Pharmaceuticals, Inc,1979 **Preparation and Characterization of Affinity Membranes** Xiaomin Yu,2005 Smart Structures and Materials ,1996 **A Treatise on Anatomy, Physiology, and Hygiene** Calvin Cutter,1872 **Transactions** Electrochemical Society,1904 Transactions of the Electrochemical Society Electrochemical Society,1904 *Transactions of the American Electrochemical Society* American Electrochemical Society,1904 Transactions of the International Electrical Congress, St. Louis, 1904 ...
