Higher Education and the Challenge of Sustainability Peter Blaze Corcoran, Arjen E.J. Wals, 2007-05-08 Sustainability challenges universities around the world to rethink their missions and to restructure their courses, research programs and life on campus. Graduates are increasingly exposed to notions of sustainability which are emotionally, politically, ethically and scientifically charged. They must be able to deal with conflicting norms and values, uncertain outcomes and futures and a changing knowledge base. At the same time they will need to be able to contextualize knowledge in an increasingly globalized society. This book provides a variety of valuable theoretical and practical resources for students, teachers, researchers and administrators who seek to integrate sustainability in higher education. Sustainability is not only explored as both an outcome and a process of learning but as a catalyst for educational change and institutional innovation. The book raises the various problematics related to this inchoate field and provides an intellectual history and critical assessment of the prospects for institutionalizing sustainability in higher education.
