Changing Law

William Herbert Page

Changing Law:

Law and Social Solidarity in Contemporary China Han Peng, 2020-12-29 This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws, thus drawing together western socio-legal theory and distinctive Chinese conditions. It draws on Durkheim's theoretical framework and methodology to develop a more comprehensive understanding of the role of law using theories of others such as Habermas and by taking into account the discussion of power and the conflicts of interests in analyzing key social features during transition. The analysis of social anomie in terms of the changes of juridical rules as well as the changes in the nature of social solidarity provides an inspiring perspective to look into contemporary social problems. The book will be essential reading for researchers and academics working in the areas of socio-legal studies, legal theory, and law and society in China.

Property Law and Climate Change Vanessa Johnston, Ben France-Hudson, 2026-04-23 *Property Law and Climate Change Inextricably Linked* reveals a critical oversight in global climate action: the failure to integrate property law into climate policy and regulatory frameworks. Through systematic analysis of mitigation and adaptation strategies, *Property Law and Climate Change Inextricably Linked* demonstrates how the neglect of property law fundamentals undermines the effectiveness of climate responses, with particular focus on Australia and New Zealand. The book offers both diagnosis and direction, examining why current approaches fall short and identifying how property law integration could strengthen climate responses. From land use planning to coastal adaptation and carbon sequestration, the authors demonstrate that property law must be integrated within climate change policy. By mapping these crucial connections, this book provides a roadmap for developing regulatory frameworks that work with rather than against existing property systems. This book will appeal to researchers in the fields of property law, environmental law, and governance and comparative law. It will also be of interest to policymakers, lawmakers, urban planners, and legal practitioners.

International Climate Change Law Daniel Bodansky, Jutta Brunnée, Lavanya Rajamani, 2017-06-08 This textbook by three experts in the field provides a comprehensive overview of international climate change law. Climate change is one of the fundamental challenges facing the world today and is the cause of significant international concern. In response, states have created an international climate regime. The treaties that comprise the regime—the 1992 United Nations Framework Convention on Climate Change, the 1997 Kyoto Protocol, and the 2015 Paris Agreement—establish a system of governance to address climate change and its impacts. This book provides a clear analytical guide to the climate regime as well as other relevant international legal rules. The book begins by locating international climate change law within the broader context of international law and international environmental law. It

considers the evolution of the international climate change regime and the process of law making that has led to it It examines the key provisions of the Framework Convention the Kyoto Protocol and the Paris Agreement It analyses the principles and obligations that underpin the climate regime as well as the elaborate institutional and governance architecture that has been created at successive international conferences to develop commitments and promote transparency and compliance The final two chapters address the polycentric nature of international climate change law as well as the intersections of international climate change law with other areas of international regulation This book is an essential introduction to international climate change law for students scholars and negotiators
