Cooking With Mother Cookery:

My Mother's Cook Book Matilda Lees Dods, 1902 *My Mother's Cook Book* Matilda Dods, 2015-01-06 An excerpt from the Preface The question that will very naturally be asked in connection with our volume is Why is such a work required at all Is there not already an abundance of books devoted to and exhausting the various branches of the subject from the monograph which discusses all the points and possibilities of cold mutton to the complete housewife whose common sense suggestions and elaborate instructions range over all possible topics from the currying of a lobster to the management of a husband To such a criticism we should reply that cookery is now accepted as both a science and an art As a science it is of course subject to all the laws of natural development while as an art it can also lay claim to the privileges of continued inspiration and the disciples of to day need not admit that all wisdom has died with the prophets who have taught in the past In sober earnest there has been during the past few years a much more general recognition of the fact that the work of cooking upon which depends so much of the comfort and in fact the happiness of existence cannot be successfully carried on at hap hazard or in a hit or miss fashion The interests imperiled are too serious and the results of failures too grave It requires and demands careful persistent study and should utilize also all possible ingenuity and creative power that can be pressed into service Originality of conception thoroughness of knowledge and precision of method may be said to be as important for the practice of cookery as for the practice of medicine and it is all evident that the more fully these are called into play for the former the greater the prospect of getting rid altogether of the latter The due recognition during the past decade of the proper position of this branch of human knowledge has led to the establishment of institutions planned to give instruction in the principles of cooking and to further its higher development as a fine art and during the next few years we hope to see the number of such institutions largely increased I was so fortunate as to obtain one of the earliest first class diplomas issued by the South Kensington School of Cookery and with this in my possession and a definite purpose before me of doing what was in my power to further the knowledge of my fellow women and the comfort of my fellow men I could no longer feel that my life was aimless even though my work should have no higher range than that of the kitchen It is pleasant to be able to state as well for the credit of the school whose teachings I have carried out as for my own satisfaction that such instruction as I have attempted to give in Great Britain and this country through lessons and practical examples with demonstrative before classes has been most cordially and favorably received in all quarters and has brought me very warm acknowledgments for practical services rendered In the course of my work with classes I have found that there was quite a general demand for a book that should embody with somewhat more comprehensiveness and completeness of detail than was possible in any single course of lectures the whole range of instruction and should give the particular application of the general principles a book that should be not a mere stereotyped schedule of dinners suppers and breakfasts nor a depressing list of semi intelligible recipes but one that should present a comprehensive insight into the general rules for the intelligent

preparation of food and at the same time clearly describe the several means and processes of arriving at desired results

indoctrination At the same time she explores the proliferation of bachelor cookbooks aimed at the man in the kitchen and the biases they display about male and female abilities tastes and responsibilities Neuhaus also addresses the impact of World War II rationing on homefront cuisine the introduction of new culinary technologies gourmet sensibilities and ethnic foods into American kitchens and developments in the cookbook industry since the 1960s More than a history of the cookbook Manly Meals and Mom s Home Cooking provides an absorbing and enlightening account of gender and food in modern America

What's Cooking, Mom? Tanya Cassidy, Florence Pasche Guignard,2015 *What s Cooking Mom* offers original and inventive narratives including auto ethnographic discussions of representations discourses and practices about and by mothers regarding food and families When it comes to food choices or lack thereof mothers stand at the intersection of several strong and sometimes conflicting forces and interests for instance those in the food industry and public health policies Daily decisions about food are usually thought of in a Western context as a matter of personal choice and private matter but as the chapters in this volume show there are important cross cultural variations associated with these issues With diverse global and comparative cross cultural narratives this volume is posed to offer important literary and ethnographic perspectives These narratives discuss the multiple strategies through which mothers manage feeding themselves and others and how these are shaped by international and regional food politics by global and local food cultures and by their own ethical values and preference as well as by those of the ones they feed Many of these mothers ask themselves and others How will I feed my child but often also have to consider the question What should we eat or avoid consuming The answers to these questions make for fascinating and sometimes sad stories that anyone interested in maternal considerations about consumption and family will find invaluable
