*The Deeper Intelligence* Andrew G. Hodges, 2004-06 Dr Hodges explores the deeper intelligence that everyone possesses offering readers the potential for using the untapped areas of their subconscious minds to achieve goals improve relationships and make their lives more productive and enjoyable *Heaven and Hell* Emanuel Swedenborg, 2010-06-04 Gain an expansive understanding of life after death with Emanuel Swedenborg's *Heaven and Hell* an unparalleled exploration of the spiritual world In this seminal work Swedenborg shares his extraordinary experiences of visiting heaven and hell providing a detailed account of the afterlife based on what he heard and saw *Heaven and Hell* delves deep into the structure and nature of spiritual realms explaining the spiritual laws that govern them and offering profound insights into what happens to us after we die Readers will discover the beauty and harmony of heaven why some people choose hell and the state of souls in the world of spirits Swedenborg's vivid descriptions and spiritual teachings offer a path to understanding our eternal journey and the reality of divine love that sustains us Whether you are curious about life after death seeking spiritual growth or interested in Swedenborg's theology *Heaven and Hell* provides transformative wisdom and a compelling vision of the afterlife Join countless readers who have found comfort inspiration and enlightenment in Swedenborg's revelations and embark on your own journey of spiritual discovery *In the Shadow of the Machine* Jeremy Naydler, 2018-05-29 Contemporary life is so deeply reliant upon digital technology that the computer has come to dominate almost every aspect of our culture What is the philosophical and spiritual significance of this dependence on electronic technology both for our relationship to nature and for the future of humanity And what processes in human perception and awareness have produced the situation we find ourselves in As Jeremy Naydler elucidates in this penetrating study we cannot understand the emergence of the computer without seeing it within the wider context of the evolution of human consciousness which has taken place over millennia Modern consciousness he shows has evolved in conjunction with the development of machines and under their intensifying shadow The computer was the product of a long historical development culminating in the scientific revolution of the 17th century It was during this period that the first mechanical calculators were invented and the project to create more complex thinking machines began in earnest But the seeds were sown many hundreds of years earlier deep in antiquity Naydler paints a vast panorama depicting human development and the emergence of electronic technology His painstaking research illuminates an urgent question that concerns every living person today What does it mean to be human and what if anything distinguishes us from machines *Living Your Magic* Robert Anthony, 2019-09-03 *Living Your Magic* lays out how life when people really look at it is like a magic trick A magic trick works because of illusion and misdirection And with all sorts of tricks of the mind human thinking and perception works just like a magic trick When people don't understand how the trick is done they get fooled every time In *Living Your Magic* Dr Robert Anthony teaches readers how to look at their life before the trick or the illusions happens and how to never be fooled again Rather than following the same

flawed premise behind almost every self help therapeutic or personal development methodology that projects people having a separate self that needs fixing Living Your Magic sees that self as an illusion The problem is that most people don t recognize it as an illusion and believe they must change or improve their self before they can be happy and live a magical life Dr Anthony reveals that everyone has an Inner Creative Genius that allows them to live a magical life if people would only learn to trust it and get out of their own way In that way life becomes easier by giving people less to think about less to remember and less to do so they can truly enjoy their mind and enjoy their life
