Development Of Thought:

The Development of Thought Graeme S. Halford, 1982 First published in 1982 Routledge is an imprint of Taylor Francis an informa company *History of Development Thought* R. Srivatsan, 2024-11-01 Development thought emerged as the governing principle of First World global hegemony in the new world order marked by the end of the Second World War and decolonization Six decades later at yet another critical geopolitical conjuncture marked by globalization and neoliberal resurgence *History of Development Thought* revisits the major strands in the development debate from the 1950s to the early twenty first century The volume places classic international interventions in critical development thinking alongside major contributions to the discourse from the Indian context Beginning by juxtaposing W A Lewis s classic liberal theory of the dual economy with P C Mahalanobis s schema for planned development in India the volume tracks the trajectory of the development debate from the Latin American neo Marxist paradigm through the mode of production debates in India to Indian and international feminist perspectives on development It explores the departures of the 1980s in India and elsewhere as theorists including Pranab Bardhan Sukhamoy Chakravarty Partha Chatterjee A O Hirschman Samuel Huntington and Amartya Sen sought to address from various perspectives the reasons for the failure of development to live up to expectations It ends with excerpts signposting the emerging strands of the development and post development debate at the turn of the twenty first century Throughout the volume remains committed to the paradigm of development as a horizon of critical thought and a field of democratic politics while paying attention to the multiple storylines of the discourse over the last 60 years This anthology together with its critical introduction and rigorous prefatory remarks for each extract will be invaluable to students and researchers in the social sciences and the humanities especially those in development studies history politics and economics as well as to activists administrators and professionals in health education and development

On the Development of Mathematical Thought During the Nineteenth Century John Theodore Merz, 1906 *Thought and Things* James Mark Baldwin, 1906 **The Expository Times** , 1919 *The Hibbert Journal* Lawrence Pearsall Jacks, George Dawes Hicks, 1916 **Social and Ethical Interpretations in Mental Development** James Mark Baldwin, 1902

Development, Sexual Rights and Global Governance Amy Lind, 2010-01-04 This book addresses how sexual practices and identities are imagined and regulated through development discourses and within institutions of global governance The underlying premise of this volume is that the global development industry plays a central role in constructing people s sexual lives access to citizenship and struggles for livelihood Despite the industry s persistent insistence on viewing sexuality as basically outside the realm of economic modernization and anti poverty programs this volume brings to the fore heterosexual bias within macroeconomic and human rights development frameworks The work fills an important gap in understanding how people s intimate lives are governed through heteronormative policies which typically assume that the family is based on blood or property ties rather than on alternative forms of kinship By placing heteronormativity at the center of analysis this

anthology thus provides a much needed discussion about the development industry's role in pathologizing sexual deviance yet also more recently in helping make visible a sexual rights agenda. Providing insights valuable to a range of disciplines, this book will be of particular interest to students and scholars of Development Studies, Gender Studies, and International Relations. It will also be highly relevant to development practitioners and international human rights advocates. The Cost of Development in China, Guangyu Hu, 2017-05-10. This book focuses on the future of China and its sustainable development and summarizes the implications, forms, causes, countermeasures, and related rules of the main costs generated during a country's period of development so as to provide a theoretical reference and decision-making consulting tools for institutions and scientific governance and management professionals. Combining China's national situation and development characteristics with the country as a unit, it uses case studies to propose the concept of cost theory and the theoretical system of national development cost. Focusing on the goals of innovation in nation building, common development, and prosperity, as well as enhancement of people's net welfare, the book summarizes and draws conclusions about various aspects of national development, including economic development cost, political, social, and cultural development cost, foreign opening up development cost, and nature development cost. It primarily establishes an indicator system of national development cost for promoting full factor productivity and reducing development cost and provides a theoretical basis for implementing the scientific political achievement view.

New Actors and Alliances in Development, Lisa Ann Richey, Stefano Ponte, 2016-03-17. This collection brings together an interdisciplinary group of scholars exploring how development financing and interventions are being shaped by a wider and more complex platform of actors than usually considered in the existing literature. The contributors also trace a changing set of key relations and alliances in development: those between business and consumers, NGOs and celebrities, philanthropic organizations and the state, diaspora groups and transnational advocacy networks, ruling elites and productive capitalists, and between new donors and developing country governments. Despite the diversity of these actors and alliances, several commonalities arise: they are often based on hybrid transnationalism and diffuse notions of development responsibility rather than being new per se; they are newly being studied as engaging in practices that are now coming to be understood as development; and they are limited in their ability to act as agents of development by their lack of accountability or pro-poor commitment. The articles in this collection point to images and representations as increasingly important in development branding and suggest fruitful new ground for critical development studies. This book was originally published as a special issue of *Third World Quarterly*.
