Berger,2013-10-18 The emergence of the Third World is generally traced to onset of the Cold War and decolonization in the 1940s and 1950s In the 1960s and 1970s the three worlds of development were central to the wider dynamics of the changing international order By the 1980s Third Worldism had peaked entering a period of dramatic decline that paralleled the end of the Cold War Into the 21st century the idea of a Third World and even the pursuit of some form of Third Worldism has continued to be advocated and debated For some it has passed into history and may never have had as much substance as it was credited with while others seek to retain or recuperate the Third World and give Third Worldism contemporary relevance Beginning with a comprehensive introduction this edited volume brings together a wide range of important contributions Collectively they offer a powerful overview from a variety of angles of the history and contemporary significance of Third Worldism in international affairs The question remains did the Third World exist what was it does it still have intellectual and political purchase or do we live in a global era that can be described as After the Third World This book was previously published as a special issue of Third world Quarterly *International Affairs* ,1983 *Bibliographie der Wirtschaftswissenschaften* ,1996 **Bibliographic Guide to Business and Economics** New York Public Library. Research Libraries,1990 *Bibliographie der Staats-und Wirtschaftswissenschaften* ,1995 **'We are Children of the Mountain'** Hans Siebers,1999 In the present globalizing world social actors are increasingly confronted with flows of people capital goods symbols information and images stemming from distant corners of the globe Faced with these flows they feel compelled to react to new impulses rework their representations and practices and redefine their identities The Q eqchi es about 600 000 people living in northern Guatemala make up such a group of actors who are increasingly immersed in global flows While they live relatively far from national and international communication centres and are renowned for their specific cultural characteristics the cash crops they produce are for the world market and global flows of religious meanings reach them through expanding churches This monograph asks whether the various aspects of their social reality can be understood in terms of modernity or modernization and if so how they deal with these aspects Are they exchanging premodern for modern aspects and simply heading for a modern destiny This book deals primarily with their religion and economy giving attention to the religious and economic meanings and practices of intervening agencies and to those of the Q eqchi es themselves **Indian Journal of Social Research** ,1973
