On May 15 18 1961 the 12th Annual Symposium on Spectroscopy was held in Chicago Over the twelve year history of this meeting it has continually grown and now ranks as one of the major technical meetings in the field of spectroscopy The scope of the program itself represents a balance between research applications and control applications between applied and the more fundamental aspects of spectroscopy Papers are presented each year in the specialty areas of X ray ultraviolet visible infrared Raman EPR and NMR spectroscopy In many instances over the years excellent work has been reported at this symposium and no further publication was made These reports were then essentially lost for further reference It is the purpose of this publication to provide a source of reference for the papers presented at the 12th Annual Symposium This first attempt at publishing a proceedings does not include the entire program Several papers could not be given complete clearance for publication and several more were intended for verbal presentation only and were never written for publication I as Coordinator of the Symposium would like to express my gratitude to the Symposium Committee John Ferraro Elwin Davis Joseph Ziomek John Kapetan L S Gray Jr Russell J Hansen J A Sheinkop L V Azaroff and Carl Moore whose diligence and labor resulted in a truly fine symposium and subsequently made possible this publication

**Developments in Applied Spectroscopy** Elwin N. Davis, 2013-11-11 This volume presents some of the papers from the

15th Mid America Symposium on Spectroscopy held in Chicago on June 2 5 1964 The Mid America Symposium is sponsored annually by the Chicago Section of the Society for Applied Spectroscopy in cooperation with the St Louis Niagara Frontier Cleveland Detroit Indianapolis and Milwaukee sections of the Society and the Chicago Gas Chromatography Discussion Group Although basically a regional meeting the Symposium continues to draw enthusiastic attendance from coast to coast and numerous foreign countries The present volume contains 45 of the 110 papers presented at the Symposium It is with some misgiving that we offer this volume as the proceedings of the meeting with less than half of the total papers included However it is the opinion of the Symposium Committee that publication of the excellent material available from the Symposium provides a valuable addition to the literature in the field of spectroscopy Response to previous volumes of this series seems to verify this opinion As Chairman of the Symposium and Editor of this volume I express my sincere appreciation to the authors whose manuscripts make up this volume I also extend my gratitude to the following members of the Symposium Committee whose time and effort made the 15th Mid America Symposium a success Mr Russell J Hansen Exhibits Mr Robert L Developments in Applied Spectroscopy ,1970 **Developments in Applied Spectroscopy** William K.
