Behavior Genetics ,1988 Developmental Neuropsychology 1998 Lisabeth F. DiLalla,1998 The study of developmental behavior genetics has become increasingly popular over the last several decades as the study of biological influences on behavior has become more accepted in psychology in general This special issue is a testament to the fact that there has been an increase in the number of researchers who are interested in the study of genetic influences on behaviors from a neuropsychological perspective The inclusion of a behavior genetic perspective in neuropsychological research allows a more in depth exploration of the ways in which both heritable and environmental influences affect basic biological behaviors which opens the way for a clearer understanding of the gene brain behavior pathway The articles that comprise this special issue take a neuropsychological perspective as they explore a variety of topics across a range of ages Thus this issue provides a unique forum for a discussion about the behavior genetic and neuropsychological aspect of development
