William Beebe,2015-06-25 Excerpt from *The Bird Its Form and Function* We find to day some thirteen or fourteen thousand different forms or species of birds upon the earth For many years ornithologists have laboured to name and to arrange in some rational order these multitudinous forms of bird life Some such arrangement is of course a necessity without a handle we should indeed be handicapped in studying a bird but let us not forget that classification is but a means to an end Far too many students of birds follow some such mode of procedure as this When a new bird is found it is shot labelled preserved in a collection and forgotten or if studying the bird with a glass all effort is centred in finding some characteristic by which it can be named and succeeding in this search is at once made for still another species whose name can in turn be added to a list Observing the habits the courtship and nest building and memorizing the song is a third phase of bird study the best of all three methods but few indeed have ever given a moment s thought to the bird itself About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Bird, Its Form and Function, by C.
