Body Of Time:

Body and Time Bianca Maria Pirani, Thomas S. Smith, 2014-10-02 Body and Time is an innovative and concise survey of penetrating essays conceptualizing the body as a physiological system embedded in a social network In its complex and multilayered structure it is aligned to and overlaps with other related functions Contributors to this publication are members of the International Sociological Association Research Committee 54 The Body in the Social Sciences and their contributions specifically refer to the RC54 Mid Term Conference The Mobile Interface and Social Change held at Sapienza University of Rome 6 December 2012 What distinguishes the architecture of the book is that collectively it constitutes a challenge to the digital media paradigm in which the body is treated simply as a two dimensional icon of space and time a relatively free form with all kinds of narratives generated by the multimedia Order in sequence should indeed be the key phrase incorporating four incisive problems dealt with in the thirteen chapters forming the body of the book identity temporality hierarchy and territoriality In short the volume demonstrates how fundamentally different ways of experiencing time are also determined by the differing cultural use of bodily rhythms a two sided narration namely of space and time Central to the understanding of this interdependence is the study of interpersonal synchronization increasing knowledge through the investigation of how rhythm music chants dance prayer and other harmonizing practices support social integration This book will attract wide interest especially from students researchers and academics in the social sciences neurosociology digital studies and further afield

Body Clocks: The biology of time for sleep, education and work Paul Kelley, Sian Griffiths, 2018-12-01 Our body's clocks make the difference between happiness and depression health and illness and even life and death The brilliant scientist Paul Kelley makes a compelling case for all organisations to allow people to work and study the hours that suit their personal circadian rhythms That way Paul argues we would all be more productive a great deal of ill health would be avoided and the world would be a better and happier place

Keeping in Time with Your Body Clock J. M. Waterhouse, 2002 The Body Clock Book provides clear and accessible advice on how to live with and not against your body clock In a clear and accessible style it explains how the body clock works how and why it can work against us and the measures we can take to optimise our feeling of health and wellbeing An essential book for anyone who wants to better understand their body

Mind and Body, 1901 **Stewardship for Body, Soul, and Spirit** Becca Rumeliotis, 2025-09-10 Healthy living is a challenge often fraught with feelings of defeat and unwanted consequences of our poor choices While we often resort to trying harder or enlisting in a program or fatalistically giving up there is a better way God has provided all we need to navigate the waters of successful daily living and being stewards of the life He's given us His Word is filled with principles covering every area of our lives Becca Rumeliotis shares from her life experiences and studies how God is faithful to lead guide and sustain us if we allow Him to be Lord of our lives and commit to following His Word in taking care of the body soul and spirit He has entrusted to us

Materialities of Passing Peter Bjerregaard, Anders Emil Rasmussen, Tim Flohr

Sørensen,2016-03-17 Passing is a common euphemism for the death of a person as he or she is said to pass away or pass on This open ended saying has at its heart a notion of transformation from one state to another which in turn grants the possibility of grasping or approximating the passage of time and the materiality of death and decay This book begins with the idea that since all material things whether animals human beings objects or buildings undergo some form of passing then the specific transformation in these passages and the materiality actively given to it can offer us a grasp of otherwise precarious temporalities It examines how human beings strive to relate to the temporal dimension of death and decay by giving new shape and direction to being and by examining its natural transformations Focusing on the materiality of passing and thereby the relationship between embodiment temporality and death Materialities of Passing offers rich case studies from Europe Papua New Guinea South Africa and the Russian Far East for exploring the material spatial and directional aspects of the very interface between life and death As such it will appeal to scholars of anthropology death studies archaeology philosophy and cultural studies
