There are few manuals, and there are some that offer general and sparsely updated information about the change that new technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

Managerial Communication for Organizational Development provides clarity for top middle and frontline managers on paramount communication issues. It helps them anticipate and respond to communication challenges managers face daily. Challenges occur rapidly and with no warning. A business can be destroyed by media manipulations of public perceptions. Developing effective communication strategies internally and externally will keep organizations viable. This book is a field manual for managers at any organizational level. *Manager's Guide to Excellence in Public Relations and Communication Management* David M. Dozier, Larissa A. Grunig, James E. Grunig, 2013-10-18. This book reports findings of a three-nation study of public relations and communication management sponsored by the International Association of Business Communicators (IABC) Research Foundation. The Excellence Study provides communication managers and public relations practitioners with information critical to their own professional growth and supplies organizations with tools that help them communicate more effectively and build beneficial relations with key publics. Communication excellence is a powerful idea of sweeping scope that applies to all organizations large or small that need to communicate effectively with publics on whom the organization's survival and growth depend. The essential elements of excellent communication are the same for corporations, not-for-profit organizations, government agencies, and professional trade associations. And they are applicable on a global basis. The study identifies three spheres of communication excellence. These spheres consider the overall function and role of communication in organizations and define the organization of this book. They are the core or inner sphere of communication excellence: the knowledge base of the communication department; the shared expectations of top communicators and senior managers about the function and role of communication and the organization's culture; the larger context that either nurtures or impedes communication excellence. This text also examines communication excellence as demonstrated in specific programs developed for specific publics.
