idea was developed in 2005 in Allan Kellehear's seminal volume *Compassionate Cities Public Health and End of Life Care*. In the ensuing ten years the theoretical aspects of the idea have been continually explored primarily rehearsing academic concerns rather than practical ones. *Compassionate Communities Case Studies from Britain and Europe* provides the first major volume describing and examining compassionate community experiments in end of life care from a highly practical perspective. Focusing on community development initiatives and practice challenges the book offers practitioners and policy makers from the health and social care sectors practical discussions on the strengths and limitations of such initiatives. Furthermore, not limited to providing practice choices, the book also offers an important and timely impetus for other practitioners and policy makers to begin thinking about developing their own possible compassionate communities. An essential read for academic practitioner and policy audiences in the fields of public health, community development, health, social sciences, aged care, bereavement care, and hospice/palliative care. *Compassionate Communities* is one of only a handful of available books on end of life care that takes a strong health promotion and community development approach.

This Research Topic is part of a series with <https://www.frontiersin.org/research-topics/50153/clinical-pharmacist-service-promotes-the-improvement-of-medical-quality>. Clinical pharmacists are integral to medical treatment and critical in clinical practice. Their responsibilities involve various activities such as outpatient pharmacy services, participation in ward rounds, medication monitoring, drug concentration monitoring, medication use guidance, and consumer education. They act as a vital support for other medical professionals, especially physicians and nurses. Their role in enhancing the quality of medical care deserves to be documented, disseminated, and further explored. This research topic will focus on the functional position of clinical pharmacists and explore how they can further enhance the quality of medical care. We welcome submissions of original research articles, brief research reports, systematic reviews, and policy and practice reviews. Contributions to this research topic should address but are not limited to the following issues: How can clinical pharmacists improve the quality of medical care? For example, clinical pharmacists may improve the quality of medical care by promoting and monitoring the rational use of drugs through innovative techniques and methods in their daily work. How do clinical pharmacists provide medication guidance and assess clinical outcomes? For example, clinical pharmacists may improve clinical outcomes through services such as pharmacy outpatient support, review of physician orders, and education on drugs. How can clinical pharmacists further play a role in the current models of care, as well as individualized medicine? For example, efforts on drug description, multidisciplinary collaborations, and consumer engagement. How can training for clinical pharmacists be

improved For example by designing appropriate courses regularly conducting relevant clinical pharmacy training establishing a comprehensive medical education framework and enhancing healthcare quality ["Code of Massachusetts regulations, 1987"](#) ,1987 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 ["Code of Massachusetts regulations, 1992"](#) ,1992 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 **Health Inequalities** Great Britain.
