Delivering Mpeg 4 Based Audio Visual Services:

Delivering MPEG-4 Based Audio-Visual Services Hari Kalva, 2005-12-01 *Delivering MPEG 4 Based Audio Visual Services* investigates the different aspects of end to end multimedia services content creation server and service provider network and the end user terminal Part I provides a comprehensive introduction to digital video communications MPEG standards and technologies and deals with system level issues including standardization and interoperability user interaction and the design of a distributed video server Part II investigates the systems in the context of object based multimedia services and presents a design for an object based audio visual terminal some of these features having been adopted by the MPEG 4 Systems specification The book goes on to study the requirements for a file format to represent object based audio visual content and the design of one such format The design introduces new concepts such as direct streaming that are essential for scalable servers The final part of the book examines the delivery of object based multimedia presentations and gives optimal algorithms for multiplex scheduling of object based audio visual presentations showing that the audio visual object scheduling problem is NP complete in the strong sense The problem of scheduling audio visual objects is similar to the problem of sequencing jobs on a single machine The book compares these problems and adapts job sequencing results to audio visual object scheduling and provides optimal algorithms for scheduling presentations under resource constraints such as bandwidth network constraints and buffer terminal constraints In addition the book presents algorithms that minimize the resources required for scheduling presentations and the auxiliary capacity required to support interactivity in object based audio visual presentations *Delivering MPEG 4 Based Audio Visual Services* is essential reading for researchers and practitioners in the areas of multimedia systems engineering and multimedia computing network professionals service providers and all scientists and technical managers interested in the most up to date MPEG standards and technologies

Recent Advances in Image and Video Coding Sudhakar Radhakrishnan, 2016-11-23 This book is intended to attract the attention of practitioners and researchers in academia and industry interested in challenging paradigms of image and video coding algorithms with an emphasis on recent technological developments All the chapters are well demonstrated by various researchers around the world covering the field of image and video processing This book highlights the current research in the image and video processing area such as image fusion image segmentation and classification image compression machine vision algorithms and video compression The entire work available in the book is mainly focusing on researchers who can do quality research in the area of image and video processing and related fields Each chapter is an independent research which will definitely motivate the young researchers to ponder into These eleven chapters available in five sections will be an eye opener for all who are doing systematic research in these fields **Introduction to Multimedia Communications**

Kamisetty Rao, Zoran Bojkovic, Dragorad Milovanovic, 2006-02-02 A comprehensive resource on multimedia communications Covers recent trends and standardization activities in multimedia communications such as layered structures underlying

theories and the current best design techniques Describes the convergence of various technologies including communications broadcasting information technology and home electronics and emerging new communication services and applications resulting from the growth of the Internet and wireless technologies Please go to www.ee.uta.edu/dip for additional information *Multimedia Systems and Applications*, 2004 *Multimedia Systems and Applications II* Andrew G. Tescher, 1999 This work presents a series of papers examining various aspects of multimedia systems and applications *IEEE ...
