

# INTRODUCTION

- **Air pollution** means any solid, liquid or gaseous substances present in the atmosphere in such concentration that may tend to be injurious to human beings or other living creatures or plants or property or enjoyment.
- It may cause diseases, allergies or death in humans, harm animals and food crops and may damage the natural or built environment.
- Human activity and natural processes can both generate air pollution.
- **Air pollution hotspots** - areas where air pollution emissions expose individuals to increased negative health effects.
