

An Introduction to Multinationals

- A **multinational company (MNC)** is a business that is registered in one country but has **manufacturing operations** or **sales outlets** in different countries
 - For example, Starbucks headquarters are in Washington, USA but they have 32,000 stores in 80 countries

- Factors such as **globalisation** and **deregulation** have contributed to the growth of MNC's, especially in developing countries

- MNC's choose locations based on factors such as **cost advantages** and **access to markets**
 - Nike originates from the USA, but 50% of their manufacturing takes place in China, Vietnam and Indonesia due to the lower production costs in these countries

Benefits & Drawbacks of Multinationals

- Approximately **60,000 multinationals** are responsible for around **half of the global trade**
 - Many of the world's largest multinational corporations have their headquarters in developed countries such as the **United States, Japan and Germany**
 - Increasingly, MNCs base some of their operations in **China**, one of the world's fastest-growing economies
 - China is the headquarters of many growing multinational corporations, such as Huawei Technologies, Lenovo and Haier

An Introduction To The Multinationals:

An Introduction to the Multinationals Michel Ghertman, Margaret Allen, 1984-01-01 *An Introduction to Multinational Management* S. Benjamin Prasad, Y. Krishna Shetty, 1976 *International business* Richard D. Hays, Christopher M. Korth, Manucher Roudiani, 1972 *Politics and Power in the Multinational Corporation* Christoph Dörrenbächer, Mike Geppert, 2011-04-14 This book was first published in 2011 The current financial and economic crisis has negatively underlined the vital role of multinational companies MNCs in our daily lives The breakdown and crisis of flagship MNCs such as Enron WorldCom Lehman Brothers Toyota and General Motors does not merely reveal the problems of corporate malfeasance and market dysfunction It also raises important questions both for the public and the academic community about the use and misuse of power by MNCs in the wider society as well as the exercise of power by key actors within internationally operating firms This book examines how issues of power and politics affect MNCs at three different levels the macro level the meso level and the micro level This wide ranging analysis shows not only that power matters but also how and why it matters pointing to the political interactions of key power holders and actors within the MNC both managers and employees *Multinational Firms in the World Economy* Giorgio Barba Navaretti, Anthony Venables, Frank Barry, 2004 Presenting a debate on multinationals that is grounded in sound economic arguments the authors explain their conclusion that multinational enterprises are generally a force for the promotion of prosperity in the world economy *Nation-States and the Multinational Corporation* Nathan M. Jensen, 2008-01-21 What makes a country attractive to foreign investors To what extent do conditions of governance and politics matter This book provides the most systematic exploration to date of these crucial questions at the nexus of politics and economics Using quantitative data and interviews with investment promotion agencies investment location consultants political risk insurers and decision makers at multinational corporations Nathan Jensen arrives at a surprising conclusion Countries may be competing for international capital but government fiscal policy both taxation and spending has little impact on multinationals investment decisions Although government policy has a limited ability to determine patterns of foreign direct investment FDI inflows political institutions are central to explaining why some countries are more successful in attracting international capital First democratic institutions lower political risks for multinational corporations Indeed they lead to massive amounts of foreign direct investment Second politically federal institutions in contrast to fiscally federal institutions lower political risks for multinationals and allow host countries to attract higher levels of FDI inflows Third the International Monetary Fund often cited as a catalyst for promoting foreign investment actually deters multinationals from investment in countries under IMF programs Even after controlling for the factors that lead countries to seek IMF support IMF agreements are associated with much lower levels of FDI inflows

The Role of Multinational Corporations in Shaping Economies Caroline Mutuku,2018-06-20 Research Paper undergraduate from the year 2018 in the subject Business economics Investment and Finance grade 1 4 language English abstract It seems most developing countries have realized the immense benefits associated with Multinational Corporations MNC s especially with regard to the productivity of the firms in the host country In the past decades there has been an unprecedented debate over whether multinational corporations yield economic benefits to the host countries but that argument appear to have varnished after a comprehensive evaluation of different elements of multinational corporations Currently most countries are attracting multinational corporations to reap the accrued benefits especially through Foreign Direct Investment which has proven to boost the host country s economy through enhancing productivity Some of the principal reasons as to why multinational corporations are considered beneficial to the host countries include technology transfer creation of new job opportunities and the inflow of capital from the MNC s parent company to its subsidiaries in the host country Foreign Direct Investment FDI is known to be one of the principal drivers of productivity in the host countries because it enhances technological transfer which in turn yields enormous benefits to the host country and the parent company In most cases host countries access superior technology through technological spillovers and this enhances the productivity of the local firms Campos states In addition host country firms may obtain other potential productivity spillovers that the presence of MNC could generate on suppliers and customer Concisely there are different ways in which multinational corporations enhance productivity of the firms Therefore this research will give an overview on the impact of multinational corporations on productivity **International Market Entry Strategies of Multinational Enterprises**

(MNEs) in Emerging Markets Nikolina Saric,2014-10-10 Master s Thesis from the year 2014 in the subject Business economics Business Management Corporate Governance grade 1 University of Vienna language English abstract Multinational enterprises MNEs are becoming increasingly present on the global market Since their products and services are offered globally their multinational strategies must be adapted to different cultures environments of target countries and their internal strengths Since the market in the 21st century is oversaturated it is no wonder that more and more MNEs are targeting emerging markets for multiple business opportunities Since markets are very dynamic entry strategies chosen by MNEs must be up to date with market changes Although MNEs are present in the global market and well acquainted with its dynamics entry into certain countries is not always an easy task The main concern of this thesis is to evaluate international

entry strategies of companies operating in fast moving consumer goods FMCG industries in China and India Additionally the thesis aims in exploring and evaluating the consistency of the market entry strategies performed by one specific company P G and two different theoretical frameworks namely Resource Based Theory by Grant 1991 and Eclectic paradigm OLI by Dunning 2000 For the purposes of this thesis I concentrate on one of the largest and best known MNEs delivering widely known consumer goods namely Procter and Gamble P G My interest lies in exploring whether P G s market entries in two target markets can be compared to above mentioned theories If not the goal is to understand inconsistencies and factors which influence them Emerging markets have a very unique nature which could be a challenge even for the most successful MNEs like P G Therefore understanding these could be a very complex but unavoidable process in order to achieve long term winning strategy **Multinational Info** ,1982
