## **Analyzing Social Knowledge:**

*Analyzing Social Knowledge* Angelo J. Corlett, 1996-10-17 *Analyzing Social Knowledge* argues for both socialized and naturalized epistemology J Angelo Corlett takes social epistemology in a new direction applying the findings of experimental cognitive psychology to theories of social knowledge Corlett analyzes social knowledge in terms of group belief individual belief truth justification coherence and reliability and responsibility He provides a critique of leading theories of social knowledge and defends his analysis against respected criticisms of naturalized epistemology The far reaching implications of *Analyzing Social Knowledge* will interest epistemologists philosophers of the mind and cognitive psychologists

**Scientific Knowledge** Barry Barnes, David Bloor, John Henry, 1996-07-15 Although science was once seen as the product of individual great men working in isolation we now realize that like any other creative activity science is a highly social enterprise influenced in subtle as well as obvious ways by the wider culture and values of its time *Scientific Knowledge* is the first introduction to social studies of scientific knowledge The authors all noted for their contributions to science studies have organized this book so that each chapter examines a key step in the process of doing science Using case studies from cognitive science physics and biology to illustrate their descriptions and applications of the social study of science they show how this approach provides a crucial perspective on how science is actually done *Scientific Knowledge* will be of interest not only to those engaged in science studies but also to anyone interested in the practice of science

**Analyzing Social Behavior** Bernard Guerin, 1994 An argument for using behavior analysis as a tool for examining and experimenting with a range of social phenomena *Analyzing Social Behavior* includes an overview of BA analyses of social structures and applications of these techniques to specific areas of social experience

**Analyzing character** Katherine Melvina Huntsinger Blackford, 1916 **Analyzing Social Problems** Jerome G. Manis, 1976 Presents a sense of sociological attitude and appreciation of world problems *Analyzing Character, the New Science of Judging Men* Katherine Melvina Huntsinger Blackford, Arthur Newcomb, 1916 ANALYZING CHARACTER KATHERINE M. H. BLACKFORD, M.D, ARTHUR

NEWCOMB, 1916 **The Politics of Social Knowledge** Larry D. Spence, 1978 The proper task of the social sciences this book argues is to understand and control the impact of social and political institutions on human life not to predict and control human behavior Such a reorientation must start in the author's view with a rejection of the assumptions of traditional Western political thought Whether or not a reader can agree in full with the argument here he is sure to find it a stimulating challenge to his own presuppositions Chief among the assumptions of Western political thought is the inevitability of hierarchy which in turn assumes the inevitability of widespread social ignorance The latter assumption flows from a view of the human species as wanting in motivation character and intelligence These assumptions according to Dr Spence have

attained the power of myth in the sense that no facts known or imaginable would be permitted to falsify them or even seriously to modify them Thus a work loving responsible intelligent person is regarded as an exception to human nature produced by hierarchical institutions and a group of cooperating procedures without structured positions of domination is treated as a case of hidden hierarchy Humankind never ceases its struggle for autonomy but is thwarted by social ignorance from Plato s allegory of the cave to the latest research in political socialization compound the ignorance because such explanations force the investigator to assert his intellectual and political superiority The weight of evidence from modern psychology is that learned is a self activated seeking process rather than a passive reception and recording of data That being so Kuhn s theory of scientific development wrongly emphasizes dogmatism with individual creativity as the exception the emphasis should be reversed Moreover Trigant Burrow was right as are Bateson and Laing in challenging Freud s view that so called normal behavior constitutes mental health Social scientists should teach citizens to free themselves from social deception no matter how pervasive and accepted Respect for our intellectual heritage as the author writes in his preface demands more than the study of the so called masters it requires our willingness to philosophize and to create theories just as they did
