Examples For Small Business Owners With Low Budget YouTube Automation:

Small Businesses and Effective ICT Carmine Sellitto, David Banks, Scott Bingley, Stephen Burgess, 2016-07-07 Small businesses make up some 90-95 percent of all global firms. Many undervalue the importance of information and communication technology (ICT). Within the small business segment, there can be significant differences amongst the avid early adopters of ICT and the laggards. Research on early adopters tends to be more prevalent as they are perceived to have a more interesting and positive story. However, late adopters and laggards also have their own interesting stories that are underreported. **Small Business and Effective ICT** draws on research undertaken over several years and documents the adoption and use of ICT across better users of ICT (Leaders), typical ICT users (Operational) and late adopters (Laggards). The findings are presented using a reformulation of the LIASE framework, which addresses a number of areas that include: ICT literacy, L (information content), communication, I (Access), A (Infrastructure), I (Support), S (and) Evaluation, E. Some 60 businesses were investigated in Australia and the UK, with each business presented as a concise vignette. The vignettes serve to show that small businesses are not as conservative in their use of ICT as the literature suggests, with examples of innovative uses of ICT in small businesses provided. Lessons for the effective use of ICT by small businesses are presented. The research design, methods adopted, presentation of findings through the vignettes, and take-away lessons have been written in a manner to appeal to a broad range of readers, including academics, researchers, students, and policy makers in the discipline.
