An Ivatan Syntax Lawrence Andrew Reid, 1966 *An Ivatan syntax*, 1966 Typescript **Occanic Linguistics** Lawrence Andrew Reid, 1966 Lexical-Functional Syntax Joan Bresnan, Ash Asudeh, Ida Toivonen, Stephen Wechsler, 2015-06-18

Lexical Functional Syntax 2nd Edition the definitive text for Lexical Functional Grammar LFG with a focus on syntax is updated to reflect recent developments in the field Provides both an introduction to LFG and a synthesis of major theoretical developments in lexical functional syntax over the past few decades Includes in depth discussions of a large number of syntactic phenomena from typologically diverse languages Features extensive problem sets and solutions in each chapter to aid in self study Incorporates reader feedback from the 1st Edition to correct errors and enhance clarity **Syntactic Analysis and Description** David Lockwood, 2005-12-07 This book is designed to teach undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semantics Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time **A Tagmemic Grammar of Ivatan** Cesar A. Hidalgo, Araceli C. Hidalgo, 1971 **A Description of Hiligaynon Syntax** Elmer P. Wolfenden, Paul E. Meier, Inge Meier, John Bendor-Samuel, 1975 *The Oxford Handbook of Ergativity* Jessica Coon, Diane Massam, Lisa deMena Travis, 2017-07-13 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction related constructions such as the anti passive related properties such as split ergativity and word order and extensions and permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a

relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns

Nominalization in Asian Languages Foong Ha Yap, Karen Grunow-Hårsta, Janick Wrona, 2011-06-29 Research on nominalization a process that gives rise to referring expressions has always played a central role in linguistic investigations Over the years there has also been growing evidence that nominalization constructions often extend to non referential domains They participate in noun modifying expressions e g genitive and relative clauses subordinate clauses and topic constructions finite structures with the nominalizers reanalyzed as TAM markers and stance constructions with evaluative attitudinal evidential and epistemic overtones This volume brings together historical and crosslinguistic evidence from more than 20 different languages representing six different language families spanning the Asian continent and the Pacific and Indian oceans to elucidate the strategies and grammaticalization pathways that give rise to both referential and non referential uses of nominalization constructions This collection highlights the diversity of strategies and at the same time the robust cyclical nature of change within and across languages The combined diachronic and typological analyses in this volume are particularly valuable for linguistic research on diachronic morphosyntax and linguistic universals and are also an important supplementary cross referencing tool for linguistic investigations of versatile and ubiquitous morphemes in under documented languages
