Divine Action:

Divine Agency and Divine Action William James Abraham, 2017 *Divine Agency and Divine Action Volume I* lays the groundwork for a constructive contribution to the contemporary debate regarding divine action. Noted scholar William J. Abraham argues that the concept of divine action is not a closed concept like knowledge but an open concept with a variety of context dependent meanings. This volume charts the history of debate about divine action among key Anglophone philosophers of religion and observes that they were largely committed to this erroneous understanding of divine action as a closed concept. After developing an argument that divine action should be understood as an open fluid concept, Abraham engages the work of William Alston, Process metaphysics, quantum physics, analytic Thomist philosophy of religion, and the theology of Kathryn Tanner. Abraham argues that divine action as an open concept must be shaped by distinctly theological considerations and thus all future work on divine action among philosophers of religion must change to accord with this vision. Only deep engagement with the Christian theological tradition will remedy the problems ailing contemporary discourse on divine action. *Divine Agency and Divine Action, Volume IV* William J. Abraham, 2021 William J. Abraham explores the concept of God as agent by attending to various problems in Christian doctrine including the relation of freedom and grace, divine action in liberation theology, the relationship of Christianity and Islam, the relation of the natural sciences to theology and apparent design, and the realm of the demonic. *Divine Agency and Divine Action, Volume I* William J. Abraham, 2017-10-20 *Divine Agency and Divine Action Volume I* lays the groundwork for a constructive contribution to the contemporary debate regarding divine action. Noted scholar William J. Emphasizes God's relationship with all of nature. *Divine Agency and Divine Action, Volume II* William J. Abraham, 2017-10-20 *Divine Agency and Divine Action Volume II* builds on Volume I which established that no generic concept of action will suffice for understanding the character of divine actions explicit in the Christian faith. Volume II argues that in order to understand divine action one must begin with the array of specific actions predicated of God in the Christian

tradition William J Abraham argues that one must practice theology in order to analyze properly the concept of divine action Abraham offers a careful review and evaluation of the particularities of divine action as they appear in the work of biblical patristic medieval and Reformation era theologians Particular attention is given to the divine inspiration of scripture creation incarnation transubstantiation in the Eucharist predestination and divine concurrence The work does not simply repeat the doctrinal formulations found in the Christian tradition but examines them in order to find fresh ways of thinking about these issues for our own time especially with respect to the contemporary debates about divine agency and divine action

Scientific Perspectives on Divine Action, 19?? *Divine Action in the Framework of Scientific Knowledge* Christoph Lameter, 2006-01-01 **How God Acts** Denis Edwards, 2010-01-27 From providence and miracles to resurrection and intercessory prayer Edwards shows how a basically noninterventionist model of divine action does justice to the universe as we know and also to central convictions of Christian faith about the goodness of God the promises of God and the fulfillment of creation Here is wonderfully lucid theology supporting an excitement of how God is at work in the universe **Unlocking Divine Action** Michael J. Dodds, 2012-09-26 A penetrating study of how the discoveries of contemporary science resonate with the thought of Thomas Aquinas to open a deeper understanding of God's action in the world publisher website

Scientific Perspectives on Divine Action Robert J. Russell, 2008 *Scientific Perspectives on Divine Action* is a collection of essays assessing the series of the same name which advances the engagement of constructive theology with the natural sciences *Divine Holiness and Divine Action* Mark C. Murphy, 2021-02-18 Holiness is the attribute most emphatically ascribed to God in Scripture but there has been little attention devoted to characterizing and considering the entailments of divine holiness In *Divine Holiness and Divine Action* Mark C Murphy defends an account of holiness indebted to Rudolf Otto's description of the experience of the holy as that of a *mysterium tremendum et fascinans* God's being holy consists in God's being someone with whom intimate union is both extremely desirable for us and yet something for which we and indeed any limited beings are unfit This notion of divine holiness is useful for addressing disputed theological questions regarding divine action In contrast to standard accounts of divine action that begin with assumptions regarding God's moral perfection or God's maximal love the appeal to divine holiness supports a rival framework for explaining and predicting divine action the holiness framework according to which God is motivated to act in ways that are a response to God's own value by keeping distance from that which is deficient defective or in any way limited in goodness This study exhibits the fruitfulness of a reorientation from the morality and love frameworks to the holiness framework by showing how such a reorientation suggests distinct approaches to perennial problems of divine action regarding creation incarnation atonement and salvation From the treatment of these perennial problems a general theme regarding divine action emerges that God's interaction with the world exhibits a radical sort of humility *Divine Action and Providence* Zondervan, 2019-11-26 Thinking Clearly and Deeply about the Theology of God's Intervention in the World The claim that God acts in the world is surely a basic

theological claim but it is one that has been understood in a wide variety of ways in the Christian theological tradition. In some accounts God appears as the largest first and most powerful agent. In others God is portrayed as the transcendent ground of all finite agency while never acting on the same plane as other agents. Divine Action and Providence represents the proceedings of the seventh annual Los Angeles Theology Conference which invited theologians across Christian traditions to contribute their constructive accounts and proposals to the theology of God's relation to and intervention in the world. The eleven diverse essays in this collection include discussions on The particularity and detail of divine action Recovering the identity of the God of providence The theological meaning of the course of history The nature of omnipotence Each of the essays collected in this volume engage with Scripture as well as with others in the field theologians both past and present from different confessions in order to provide constructive resources for contemporary systematic theology and to forge a theology for the future

Divine Action, Determinism, and the Laws of Nature Jeffrey Koperski, 2019-11-28 A longstanding question at the intersection of science philosophy and theology is how God might act or not when governing the universe. Many believe that determinism would prevent God from acting at all since to do so would require violating the laws of nature. However when a robust view of these laws is coupled with the kind of determinism now used in dynamics a new model of divine action emerges. This book presents a new approach to divine action beyond the current focus on quantum mechanics and esoteric gaps in the causal order. It bases this approach on two general points. First that there are laws of nature is not merely a metaphor. Second laws and physical determinism are now understood in mathematically precise ways that have important implications for metaphysics. The explication of these two claims shows not only that nonviolationist divine action is possible but there is considerably more freedom available for God to act than current models allow. By bringing a philosophical perspective to an issue often dominated by theologians and scientists this text redresses an imbalance in the discussion around divine action. It will therefore be of keen interest to scholars of Philosophy and Religion the Philosophy of Science and Theology

The Concept of Divine Action James Albert Keller, 1969 Divine Agency and Divine Action William James Abraham, 2017 Argues that in order to understand divine action one must begin with the array of specific actions predicated of God in the Christian tradition *Philosophy, Science and Divine Action* Fount LeRon

Shults, Nancey C. Murphy, Robert John Russell, 2009 One of the most important and controversial themes in the contemporary dialogue among scientists and Christian theologians is the issue of divine action in the world. This volume brings together contributions from leading scholars on this topic which emerged out of the Scientific Perspectives on Divine Action project co-sponsored by the Vatican Observatory and the Center for Theology and Natural Science. This multi-year collaboration involved over 50 authors meeting at five international conferences. The essays collected here demonstrate the pervasive role of philosophy in this dialogue *Adventures in the Spirit* Philip Clayton, In *Adventures in the Spirit* respected and influential theologian Philip Clayton argues that two major intellectual movements of our day panentheism and emergence are

converging and that together they offer exciting new vistas for theological reflection On the one hand over the last decades many theologians have been re conceiving the God world relation panentheistically affirming a radical indwelling of God within the world and the world within God On the other hand scientists have begun to abandon the reductionist ideology that characterized much of the modern period with a new emphasis on emergence Their study of how new novel structures and entities arise throughout the evolutionary process yields a much more open ended holistic vision of reality Clayton argues

The Problem of Divine Action in the World Joel Archer,2024-02-01 The world s major monotheistic religions share the view that God acts in the world This Element discusses the nature of divine action with a specific focus on miracles or special divine acts Miracles are sometimes considered problematic Some argue that they are theologically untenable or that they violate the laws of nature Others claim that even if miracles occur it is never rational to believe in them based on testimony Still others maintain that miracles are not within the scope of historical investigation After addressing these objections the author examines the function of miracles as signs in the New Testament

Divine Agency and Divine Action William James Abraham,2017 This study lays the groundwork for a constructive contribution to the contemporary debate regarding divine action It charts the history of debate about divine action among key Anglophone philosophers of religion and observes that they were largely committed to this erroneous understanding of divine action as a closed concept

Divine Agency and Divine Action, Volume IV William J. Abraham,2021-05-20 In the final of four volumes William J Abraham seeks an account of God as an agent Systematic theology raises deep metaphysical questions about the central concepts we use in our thinking about God If God is an agent the question of how to articulate this conviction arises Abraham illumines the concept of God as agent by attending to various traditional problems in Christian doctrine like the relation of freedom and grace divine action in liberation theology the presence of God in the Eucharist divine providence the relationship of Christianity and Islam the relation of the natural sciences to theology and apparent design and the realm of the demonic Divine action is the point of departure for reflection on these topics It not only clarifies the concept of God as an agent but also solutions to these traditional problems
