unravel these complex questions Ann Morning takes a close look at how scientists are influencing ideas about race through  
teaching and textbooks Drawing from in depth interviews with biologists anthropologists and undergraduates Morning  
explores different conceptions of race finding for example that while many sociologists now assume that race is a social  
invention or construct anthropologists and biologists are far from such a consensus She discusses powerful new genetic  
accounts of race and considers how corporations and the government use scientific research for example in designing DNA  
ancestry tests or census questionnaires in ways that often reinforce the idea that race is biologically determined Widening  
the debate about race beyond the pages of scholarly journals The Nature of Race dissects competing definitions in  
straightforward language to reveal the logic and assumptions underpinning today s claims about human difference
