Design Through Making

Frederick W. Cooper, D. W. Gawn

Design Through Making:

Design to Renourish Eric Benson, Yvette Perullo, 2017-01-06 Inspiration is everywhere when you stop to not just smell but watch the roses Mother Nature's interwoven relationships between all life can serve as a powerful model for graphic designers to create sustainable print and digital work Design to Renourish is a book for the graphic design professional that helps to integrate sustainability into their workflow through a design process called systems thinking This process asks the graphic designer to approach a design problem by being more informed and aware of and influenced by the impacts that material and vendor choices have on one another the planet and consequently on us The book not only walks the reader through how to design with Mother Nature as a model but also offers solutions to the real life challenges of working with the client to create sustainable work Through ten case studies that feature interviews with international design teams who embrace a sustainable systems methodology the reader will gain valuable insights on how to design to renourish and improve life on Earth

Design Materials and Making for Social Change Rebecca Earley, Rosie Hornbuckle, 2023-06-01 Design Materials and Making for Social Change spans the two interconnected worlds of the material and the social at different scales and in different contexts and explores the value of the knowledge skills and methods that emerge when design researchers work directly with materials and hold making central to their practice Through the social entanglements of addressing material impacts the contributors to this edited volume examine homelessness diaspora migration the erosion of craft skills and communities dignity in work and family life the impacts of colonialism climate crisis education mental health and the shifting complexities in collaborating with and across diverse disciplines and stakeholders This book celebrates the role of materials and making in design research by demonstrating the diverse and complex interplay between disciplines and the cultures it enables when in search of alternative futures Design Materials and Making for Social Change will be of interest to scholars in materials design textile design product design fashion design maker culture systemic design social design design for sustainability and circular design

Textile Design Theory in the Making Elaine Igoe, 2021-07-15 Textile design inhabits a liminal space spanning art design and craft This book explores how textile design bridges the decorative and the functional and takes us from handcrafting to industrial manufacture In doing so it distinguishes textiles as a distinctive design discipline against the backdrop of today's emerging design issues With commentaries from a range of international design scholars the book demonstrates how design theory is now being employed in diverse scenarios to encourage innovation beyond the field of design itself Positioning textiles within contemporary design research Textile Design Theory in the Making reveals how the theory and practice of textile design exist in a synergistic creative relationship Drawing on qualitative research methods including auto ethnography and feminist critique the book provides a theoretical underpinning for textile designers working in interdisciplinary scenarios uniting theory and texts from the fields of anthropology philosophy literature and material design

Making Design Theory Johan Redstrom, 2017-09-01 A new

approach to theory development for practice driven research proposing that theory is something made in and through design. Tendencies toward academization of traditionally practice based fields have forced design to articulate itself as an academic discipline in theoretical terms. In this book Johan Redström offers a new approach to theory development in design research one that is driven by practice experimentation and making. Redström does not theorize from the outside but explores the idea that just as design research engages in the making of many different kinds of things theory might well be one of those things it is making. Redström proposes that we consider theory not as stable and constant but as something unfolding something acted as much as articulated inherently fluid and transitional. Redström describes three ways in which theory in particular formulating basic definitions is made through design the use of combinations of fluid terms to articulate issues the definition of more complex concepts through practice and combining sets of definitions made through design into programs. These are the building blocks for creating conceptual structures to support design. Design seems to thrive on the complexities arising from dichotomies form and function freedom and method art and science. With his idea of transitional theory Redström departs from the traditional academic imperative to pick a side theory or practice art or science. Doing so he opens up something like a design space for theory development within design research.

Let There be Light - A Guide to Making and Decorating Lamp Shades in the Home Kay Hardy, 2013-01-04

Let There be Light is a vintage guide to designing making and decorating lampshades. An often neglected opportunity for money saving and self expression the lampshade can be a practical centrepiece of any room. This step by step guide walks the reader through every step of the process making it suitable for DIY novices and hand crafting veterans alike. Contents include Fabric or Paper Color Hints Simple Shapes Best Paste on Trims Sew on Trims Cutting the Round Shade Cutting the Square or Oblong Shade Cutting Fluted Shades Attaching to the Frame etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable modern high quality edition complete with a specially commissioned new introduction on making lampshades.

Making Architecture Through Being

Human Philip D. Plowright, 2019-11-26 Architecture can seem complicated mysterious or even ill defined especially to a student being introduced to architectural ideas for the first time One way to approach architecture is simply as the design of human environments When we consider architecture in this way there is a good place to start ourselves Our engagement in our environment has shaped the way we think which we in turn use to then shape that environment It is from this foundation that we produce meaning make sense of our surroundings structure relationships and even frame more complex and abstract ideas This is the start of architectural design Making Architecture Through Being Human is a reference book that presents 51 concepts notions ideas and actions that are fundamental to human thinking and how we interpret the environment around us The book focuses on the application of these ideas by architectural designers to produce meaningful spaces that make sense to people Each idea is isolated for clarity in the manner of a dictionary with short and concise definitions examples and illustrations They are organized in five sections of increasing complexity or changing focus While many of the entries might be familiar to the reader they are presented here as instances of a larger system of human thinking rather than simply graphic or formal principles The cognitive approach to these design ideas allows a designer to understand the greater context and application when aligned with their own purpose or intentions Photographic Apparatus, Making and Adapting Frederick W.
