Perlmutter, Murray Arnold Straus**

Couple Observational Coding Systems:

Couple Observational Coding Systems Patricia K. Kerig, Donald H. Baucom, 2004-07-22 A companion volume to Family Observational Coding Systems this book moves from the triad to the dyad and provides a showcase for significant developments in the coding of intimate couple interactions The hope is that this book will contribute to the broadening and deepening of the field by disseminating information both about the coding systems that have been developed as well as the conceptual and methodological issues involved in couple observational research The first three chapters present overviews of conceptual and methodological issues in the study of couple processes The remaining chapters describe contributions to the field by 16 teams of researchers Each chapter provides information about the conceptual underpinnings and structure of the coding system developed by the authors and evidence for its psychometric properties Couple Observational Coding Systems will be of interest to researchers studying couple interactions as well as clinicians who work with couples **The Development of a Couple Observational Coding System for Computer-mediated Communication** Martha S. Rackets, 2020 Observational Coding Systems Applied to Study Interactions Between Couples where One Spouse Has a Chronic Condition Stephanie Linda Ellis-Gray, 2013 This thesis comprises a systematic literature review and empirical paper investigating observational coding systems that have been applied to study interactions between couples where one spouse has a diagnosis of a chronic condition The literature review offers a critical evaluation of nine coding systems that have been used by 14 papers A description of each coding system is provided as well as its theoretical development evaluation of its application reliability validity generalizability and utility with a chronic condition population The review concludes that tailored coding systems need to be developed that focus on specific behaviours that would inform care of someone with a chronic condition The empirical paper presents the development and psychometric evaluation of an observational coding system for person centred spousal care Eleven couples where one spouse had a diagnosis of dementia were video taped completing an everyday task These videos were coded by three trained raters Care giving spouses also completed the Birmingham Relationship Continuity Measure as a measure of relationship continuity Results suggested that the coding system had good inter rater reliability although validity needs to be evaluated The hypothesis that spouses scoring high on relationship continuity would relate using a more person centred approach was not supported *The Oxford Handbook of Relationship Science and Couple Interventions* Kieran T. Sullivan, Erika Lawrence, 2016-07-15 Marriage and other long term committed relationships are an integral part of our lives and confer many benefits People in satisfying marriages report greater life happiness live longer and are less vulnerable to mental and physical illness Unfortunately many couples experience significant relationship distress and about half of marriages end in divorce Among those who stay married a notable number of couples remain in unstable severely distressed marriages for years or even decades Given the serious physical and psychological consequences of relationship distress and divorce for spouses and their children it is clear that

relationship science the basic and applied study of relationship development maintenance and dysfunction is of critical importance The Oxford Handbook of Relationship Science and Couple Interventions showcases cutting edge research in relationship science including couple functioning relationship education and couple therapy The book presents the most current definitions of and classifications for relationship dysfunction and discusses the latest research on the biological psychological and interpersonal causes and correlates of couple dysfunction and subsequent treatment implications The latest findings regarding empirically supported prevention and treatment interventions for couple dysfunction are highlighted as well as diversity and cultural issues in the context of working with couples This Handbook will appeal to researchers who seek to understand the development of relationship distress and design interventions to prevent and treat couple distress and clinicians who are diagnosing assessing and treating couple dysfunction

The Cambridge Handbook of Group Interaction Analysis Elisabeth Brauner, Margarete Boos, Michaela Kolbe, 2018-08-02 This Handbook provides a compendium of research methods that are essential for studying interaction and communication across the behavioral sciences Focusing on coding of verbal and nonverbal behavior and interaction the Handbook is organized into five parts Part I provides an introduction and historic overview of the field Part II presents areas in which interaction analysis is used such as relationship research group research and nonverbal research Part III focuses on development validation and concrete application of interaction coding schemes Part IV presents relevant data analysis methods and statistics Part V contains systematic descriptions of established and novel coding schemes which allows quick comparison across instruments Researchers can apply this methodology to their own interaction data and learn how to evaluate and select coding schemes and conduct interaction analysis This is an essential reference for all who study communication in teams and groups

Handbook of Assessment and Treatment Planning for Psychological Disorders Martin M. Antony, David H. Barlow, 2011-10-20 Widely regarded as a premier clinical reference this book provides state of the science tools for conducting effective assessments and using the results to plan and monitor evidence based interventions Leading authorities present proven approaches to screening and assessment for specific psychological problems They offer practical guidance and case examples to help clinicians select the best measures for different populations and assessment purposes Recommended instruments and procedures are described including applications for managed care and primary care settings Many of the chapters feature detailed tables that compare and contrast relevant measures New to This Edition Thoroughly updated with new instruments and research findings Chapter on the role of assessment in evidence based treatment Additional disorder specific chapter impulse control disorders Chapter explaining how to evaluate the reliability and validity of a measure

Family Observational Coding Systems Patricia K. Kerig, Kristin M. Lindahl, 2000-08 This vol presents details on the development and use of several observational coding systems for use in family research Each is most appropriate for some kinds of work and extensions for others For researchers students and clinicians dealing with families

Oxford Handbook

of Personality Assessment James N. Butcher, 2009-07-14 Oxford Handbooks offer authoritative and up to date reviews of original research in a particular subject area Specially commissioned chapters from leading figures in the discipline give critical examinations of the progress and direction of debates as well as a foundation for future research Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities social sciences and sciences As one of psychology s oldest fields personality assessment is one of the most extensively studied subsets of contemporary psychology The Oxford Handbook of Personality Assessment synthesizes new and existing literature with clinical practice to provide a comprehensive volume on contemporary personality assessment including its historical developments underlying methods applications contemporary issues and assessment techniques This handbook part of the Oxford Library of Psychology addresses both the historical roots of personality assessment and the evolution of its contemporary methodological tenets thus providing a foundation for the handbook s other innovative focus the application of personality assessment in clinical personnel and forensic assessments With a wealth of respected international contributors and unequalled breadth of content the Oxford Handbook of Personality Assessment offers an authoritative and field encompassing resource for researchers and clinicians from across the medical health and psychology disciplines i e clinical psychology psychiatry and social work and would be an ideal text for any graduate course on the topic of personality assessment

Developing an Observational Coding System on Racial Issues for Black-white Couples Alycia C. Scott, 2013 Interracial marriages are increasing steadily in the United States and Black White interracial couples have a unique experience as compared with other interracial pairings Black White couples experience more stressors discrimination lack of support from friends and family and also may exhibit more protective factors partner acceptance strong coping skills in their relationships both of which impact the quality of the romantic relationship Foeman Nance 2002 Due to the biases that exist in self report measures on couple satisfaction and relationship quality Paulhus 1989 1990 this study sought to develop a reliable observational coding system to objectively measure how Black White couples discuss and cope together with issues surrounding race and racial difference Successive Cohort Design Epstein et al 2007 was utilized due to the hypothesis that this design would allow for the coding system to be improved mid study ultimately resulting in a more relevant and reliable coding system Participating couples n 9 were divided into three cohorts After three codebook iterations one code out of 21 Social Support Positive was consistently reliable across all cohorts and six other codes Discrimination Social Support Negative Coping Passive Increased Racial Awareness Stress Partner Positivity achieved slightly low to good reliability in two of three cohorts Code frequency data corroborate previous research identifying salient themes for Black White interracial couples Lack of social support was common as was higher frequency of negative racial identity The couples studied also employed passive coping strategies three times more often than active strategies consistent with previous findings Foeman and Nance 2002 Due to several limitations of the current study small n inadequate training time overlap of coders across

cohorts it is recommended that the final codebook of this study be applied to a larger sample with newly trained coders to assess sufficiently the reliability of the overall coding system Future research that assesses how codes derived from this coding system correlate with relationship satisfaction measures can further inform couples treatment The New Handbook of Language and Social Psychology W. Peter Robinson, Howard Giles, 2001-06-08 What makes a good argument How is language used to create social influence How social is computer mediated communication This new fully updated and revised The New Handbook of Language and Social Psychology reflects the increasingly diverse range of linguistic topics that social psychologists have investigated over the decade since the previous edition of this seminal work was published Whilst the basic organization of the text remains the same explanatory frameworks are accorded greater prominence than before and persons are seen as agents of communicative interaction rather than as victims of external of forces Processes and actions are highlighted i e how people do what they do and how they manage the discourse In the final section several applied topics reflect our changing lifestyle computer mediated communication mass media and organizations The New Handbook of Language and Social Psychology is an essential source book for all psychologists concerned with language and how it functions in human communication Those interested in interpersonal and intergroup social relations will find much relevance as will practitioners and other professionals working in health and welfare multilingual contexts and organizations

Behavioral Assessment Alan S. Bellack, Michel Hersen, 1988 Comparison of Nurses' Clinical Assessment and Self-report Measures of Marital Satisfaction of Primiparous Couples Mary E. Dillinger, 1988 Marketing to the Changing Household Mary Lou Roberts, Lawrence H. Wortzel, 1984 A Handbook of Clinical Adult Psychology S. J. E. Lindsay, Graham E. Powell, 1987 The most comprehensive authoritative and practical guide for clinical psychologists in practice and in training Marital Therapy Philip H. Bornstein, Marcy T. Bornstein, 1986 **Meeting Individual and Couple Needs in Marriage** Arlene Ruth Saitzyk, 1992 **The Role of Individual Subjective Experiences in Influencing Perceptions of Close Relationships** Jeffrey Daryl Ball, 1985 **Small Groups and Social Interaction** Herbert H. Blumberg, 1983 The situation and things that people bring with them Physical situation Personality social characteristics and group composition Impressions of the group Social influence Helping and hurting Friendship and attraction Nature of the group structure and function Social interaction and task Roles and relationships Leadership **Handbook of Family Measurement Techniques: Abstracts** John Touliatos, Barry F. Perlmutter, Murray Arnold Straus, 2001 This three volume set is intended for researchers clinicians and students in the family and related fields Volume 1 includes abstracts of 976 family measurement instruments cited in the published literature 1929 1986 Volume 2 picks up where the initial volume leaves off with abstracts of 367 instruments published 1987 1996 Abstracts in Volume 1 and 2 are preceded by overviews written by authorities in family studies that organize and review the instruments in each chapter Volume 3 contains 168 of the instruments abstracted in Volume 2 reproducing them in full along with their scoring

instructions Volume 3 also provides author instrument title and subject indexes for all three volumes An attempt has been made to include instruments in the Handbook that are representative of all areas of family studies that are conceptually and psychometrically sound and that have been used to evaluate diverse populations Publisher description Forthcoming
