Origins of Darwin's Evolution J. David Archibald,2017-10-10 Historical biogeography the study of the history of species through both time and place first convinced Charles Darwin of evolution This field was so important to Darwin s initial theories and line of thinking that he said as much in the very first paragraph of On the Origin of Species 1859 and later in his autobiography His methods included collecting mammalian fossils in South America clearly related to living forms tracing the geographical distributions of living species across South America and sampling peculiar fauna of the geologically young Galapagos Archipelago that showed evident affinities to South American forms Over the years Darwin collected other evidence in support of evolution but his historical biogeographical arguments remained paramount so much so that he devotes three full chapters to this topic in On the Origin of Species Discussions of Darwin s landmark book too often give scant attention to this wealth of evidence and we still do not fully appreciate its significance in Darwin s thinking In Origins of Darwin s Evolution J David Archibald explores this lapse showing how Darwin first came to the conclusion that instead of various centers of creation species had evolved in different regions throughout the world He also shows that Darwin s other early passion geology proved a more elusive corroboration of evolution On the Origin of Species has only one chapter dedicated to the rock and fossil record as it then appeared too incomplete for Darwin s evidentiary standards Carefully retracing Darwin s gathering of evidence and the evolution of his thinking Origins of Darwin s Evolution achieves a new understanding of how Darwin crafted his transformative theory      **Darwin and Design** Michael Ruse,2003 In clear non technical language Ruse

offers a full and fair assessment of the status of the argument from design in light of both the advances of modern evolutionary biology and the thinking of today's philosophers with special attention given to the supporters and critics of intelligent design

**Darwin and Evolution for Kids** Kristan Lawson, 2003-10-01 Darwin and Evolution for Kids traces the transformation of a privileged and somewhat scatterbrained youth into the great thinker who proposed the revolutionary theory of evolution Through 21 hands on activities young scientists learn about Darwin's life and work and assess current evidence of evolution Activities include going on a botanical treasure hunt keeping field notes as a backyard naturalist and tying knots for ship sails like those on the HMS Beagle Children also learn how fossils are created trace genetic traits through their family trees and discover if acquired traits are passed along to future generations By encouraging children parents and teachers to define the differences between theories and beliefs facts and opinions Darwin and Evolution for Kids does not shy away from a theory that continues to spark heated public debate more than a century after it was first proposed

**Darwinian Evolution** Antony Flew, Darwinian Evolution is a study of the historical background of Darwin's ideas of their logical structure and of their alleged and actual implications Flew explores the Scottish Enlightenment an important and often neglected aspect of Darwin's intellectual background He compares Darwin with such figures as Adam Smith Thomas Malthus and Karl Marx emphasizing not the similarities but the differences between the natural and social sciences Flew argues that social science must do what natural science does not take account of individual choice

**Darwin, evolution, evolutionisms** Ana Leonor Pereira, João Rui Pita, Pedro Ricardo Fonseca, 2011-12-01

150 anos mais precisamente em 24 de Novembro de 1859 Darwin deu a conhecer um novo paradigma da história natural através da publicação *A Origem das Espécies*. Como a epistemologia já constatou, a teoria darwiniana da descendência com modificações ou teoria da seleção natural levou cerca de 20 anos a ser construída ou seja entre 1837 e 1859 grosso modo. Os 150 anos de história do darwinismo e da evolução apresentam a fecundidade da teoria da seleção natural tanto no plano das ciências da vida e do homem como no plano das culturas. Tal como em quase todo o mundo também em Portugal a receção de Darwin iniciou-se nos anos 60 do século XIX apresentando novidades surpreendentes atendendo escala portuguesa. Em 2009 o Grupo de História e Sociologia da Ciência do Centro de Estudos Interdisciplinares do Século XX da Universidade de Coimbra organizou o Encontro Internacional Darwin Darwinismos Evolução 1859 2009. Esta reunião científica pretendeu ser um espaço de discussão aberto a todos os interessados neste tema tanto no plano nacional como internacional. Os textos agora publicados constituem uma coletânea de muitos textos ampliados e que serviram de bases comunicadas apresentadas 150 years ago on 24th November 1859 Darwin launched a new paradigm of natural history with the publication of his work *On the Origin of the Species*. As epistemology has shown Darwin's theory of descent with modification or the theory of natural selection took some 20 years to develop i.e. between 1837 and 1859 broadly speaking. The 150 year history of Darwinism and evolution show the fecundity of this theory in both the life sciences and culture. In Portugal as in much of the rest of the world the reception of Darwin only really got going in the 1960s and took an interesting form. In 2009 the History and Sociology of Science group at the Centre for 20th century Interdisciplinary Studies at the University of Coimbra organized the international conference on Darwin Darwinisms Evolution 1859 2009 to provide a forum for anyone interested in the subject both nationally and internationally. The texts published here are extended versions of the papers presented at that conference.
