Development Geography:

Making Development Geography Victoria Lawson, 2014-03-18 Making Development Geography is a timely new book which introduces readers to the major themes and debates in development geography. It argues cogently that the field is engaged in an ongoing process of reinventing itself as critical development geography and highlights issues such as identity, globalization, social movements, and sexuality. Readers are guided through the key concepts and developments of the last 50 years, surveying the themes of Keynesianism, Marxism, and post-colonialism. At the same time, each chapter uses international examples to discuss important contemporary issues so that the real-world applications of theory can be understood. This enlightening book offers a comprehensive introduction to the fundamental debates for anyone with an interest in development issues.

Key Concepts in Development Geography Rob Potter, Dennis Conway, Ruth Evans, Sally Lloyd-Evans, 2012-05-17 An excellent and supremely accessible guide to some key issues in development geography. Stuart Corbridge, London School of Economics. Provides a clearly stated, informed, and strongly structured pathway through the key literatures and debates. Jonathan Rigg, Durham University. Organized around 24 short essays. Key Concepts in Development Geography is an introductory text that provides students with the core concepts that form contemporary research and ideas within the development geography discipline. Written in a clear and transparent style, the book includes an introductory chapter providing a succinct overview of the recent developments in the field, over 24 key concept entries that provide comprehensive definitions, explanations, and evolutions of the subject, excellent pedagogy to enhance students' understanding, including a glossary, figures, diagrams, and further reading. Organized around five of the most important areas of concern, the book covers the meanings and measurement of development, its theory and practice, work, employment, and development, people, culture, and development, and contemporary issues in development. The perfect companion for undergraduate and postgraduate students on geography degrees, the book is a timely look at the pressingly important field of international development studies today.

Development Geography Rupert Hodder, 2005-06-21 Development Geography is an informative and vibrant introductory-level text with a wealth of contrasting case studies and illustrations. Written to stimulate critical thought and discussion about development, it does not assume any clear-cut distinction between developed and developing parts of the world. Case studies highlight the problems and possible solutions at local, national, and international scales. These include food production in Senegal, Disney in China, Hurricane Mitch in Honduras, corruption in Bulgaria, and further studies from Russia, Bangladesh, and Vietnam. Development Geography is the fifth book to be published in the popular modular text series Routledge Contemporary Human Geography.

Geographies of Development Robert Potter, Tony Binns, Jennifer A. Elliott, Etienne Nel, David W. Smith, 2017-12-14 Now in its fourth edition, Geographies of Development: An Introduction to Development Studies remains a core, balanced, and comprehensive introductory textbook for students of Development Studies, Development Geography, and related fields. This

clear and concise text encourages critical engagement by integrating theory alongside practice and related key topics throughout. It demonstrates informatively that ideas concerning development have been many and varied and highly contested, varying from time to time and from place to place. Clearly written and accessible for students who have no prior knowledge of development, the book provides the basics in terms of a geographical approach to development: what, where, when, and why. Over 200 maps, charts, tables, textboxes, and pictures break up the text and offer alternative ways of showing the information. The text is further enhanced by a range of pedagogical features: chapter outlines, case studies, key thinkers, critical reflections, key points, and summaries, discussion topics, and further reading.

Geographies of Development continues to be an invaluable introductory text not only for geography students but also anyone in area studies, international studies, and development studies.

Geography and Development James Samuel Fisher, 1995. Developed around the theme of economic development, this edition has been completely revised. The text comprehensively covers the basic concepts of regional geography, exploring topics such as population, resources, cultural elements, and our relationship with the environment.

The New Routledge Handbook of Political Ecology Jessica Hope, Elia Apostolopoulou, Yolanda Ariadne Collins, 2025-12-30. The New Routledge Handbook of Political Ecology offers a state-of-the-art exploration of contemporary political ecology, grounded in the field's radical foundations and its longstanding connections to political activism. This book is organized around the field's engagement with contemporary political issues, spanning 52 chapters. Part I explores Decolonizing Political Ecology; Part II examines Activism and Praxis; and Part III focuses on the Making of Twenty-First-Century Natures. Adopting an inclusive, cross-disciplinary approach, the book features a gender-balanced and ethnically diverse range of authors, including contributions from scholars at various career stages. This diverse representation is reflective of a commitment to challenging established hierarchies within political ecology and recognizing the varying perspectives researchers themselves bring to the field. This editorial strategy has proven intellectually enriching, resulting in a dynamic collection that broadens and deepens our understanding of what political ecology is and what it can achieve. Together as editors and authors, we contribute a forward-looking overview of contemporary Political Ecology, offering an essential reference for scholars conducting research that is relevant, ethical, critical, and hopefully transformative, as well as for activists involved in environmental conflicts and struggles around the world. Chapters 26 and 36 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 International license.

Entrepreneurship Training in Rural Parts of Bihar/India Tobias Aberle, 2020-05-11. Tobias Aberle examines how an entrepreneurship training helps disadvantaged youths in rural parts of Bihar, India, to cope with structural conditions that enable or constrain them. The present research reveals that young entrepreneurs can be divided into two groups: those who developed personal initiative and thus coped with limiting structural conditions very proactively, and those who solely behaved in a reactive way. For many entrepreneurs, the self-employed

activity was only a Plan B as in reality they sought for high prestige career jobs. For entrepreneurship training to become a tool of empowerment the range of training must be significantly adjusted in accordance with young trainees social and educational backgrounds. In addition a functioning ecosystem for entrepreneurship education must be in place which ensures support for individual entrepreneurs through mentorship and networks.
