Double Mirrors:

The Two Cultures: Shared Problems Ernesto Carafoli, Gian Antonio Danieli, Giuseppe O. Longo, 2010-06-28 The aim of the book is to encourage an in depth discussion of problems of fundamental importance that are common to the two cultures but that are traditionally seen from different perspectives The forum will bring together scientists philosophers humanists musicians with the aim of fostering comprehension of problems that have traditionally troubled humankind and establish more fertile grounds for the communication between the two cultures The themes of the contributions are the followings the concept of time infinity the concept and meaning of nothingness numbers intelligence and the human mind basic mechanisms in the production of thought and of artistic creation the relationship between artistic and scientific creativity

Mirrors James Powell Cocke Southall, 1923 **Mirrors, prisms and lenses** James Powell Cocke Southall, 1918 Symmetry As A Developmental Principle In Nature And Art Werner Hahn, 1998-10-16 Looking beyond the boundaries of various disciplines the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges He explains that it is possible to readapt art to the sciences and vice versa by means of an evolutionary concept of symmetry Many pictorial examples are included to enable the reader to fully understand the issues discussed Based on the artistic evidence that the author has collected he proposes that the new ars evolutoria can function as an example for the sciences The book is divided into three distinct parts each one focusing on a special issue In Part I the phenomenon of symmetry including its discovery and meaning is reviewed The author looks closely at how Vitruvius Polyclitus Democritus Plato Aristotle Plotinus Augustine Alberti Leonardo da Vinci and Durer viewed symmetry This is followed by an explanation on how the concept of symmetry developed The author further discusses symmetry as it appears in art and science as well as in the modern age Later he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science In Part II he covers the points of contact between the form developing process in nature and art He deals with biological questions in particular evolution The collection of new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry in Part III The author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles He demonstrates symmetry as a far reaching leading structuring causal element of evolution as the idea lying behind nature and culture Numerous controllable reproducible double mirror experiments on a new stereoscopic vision verify a symmetrization theory of perception
