Dr Eckeners Dream Machine:

Dr. Eckener's Dream Machine Douglas Botting,2002-10-01 It wasn't the airplane that first romanced the public's imagination at the dawn of the twentieth century but the great airships known as dirigibles or zeppelins. Championing this great leap into the technological future was a visionary German entrepreneur Dr Hugo Eckener. For Eckener the development of the airship especially coming in the aftermath of the First World War represented an opportunity to shrink the world through safe and speedy international travel. Douglas Botting's engrossing story vividly recaptures the spirit of the times when new technologies in communication, transportation, manufacturing, and other areas were revolutionizing society. The airship reached its apotheosis with the round the world flight of the Graf Zeppelin in 1929. They were a source of wonder wherever they flew and Eckener was likened to Christopher Columbus, hailed around the world as the great explorer of his day.

Dr Eckener's Dream Machine Douglas Botting,2002-07 Based on the Graf Zeppelin's amazing round the world flight in 1929, the first ever passenger circumnavigation by air, the book tells the story of the Zeppelin airship, one of the most spectacular technological and operational marvels of its age. The year 2000 marked the hundredth anniversary of the maiden flight of the first experimental Zeppelin airship. A further 115 giant airships were built and flown by the Zeppelin company based at Friedrichshafen on the shores of Lake Constance in Germany, mostly for the purposes of war, but the most successful and best loved was the second to last of them, Dr Hugo Eckener's round the world airship, Graf Zeppelin, the dream machine. Based on the reports and recollections of those on board, including Lady Grace Drummond Hay, an attractive young aristocratic English widow and the man at the heart of the story, the airship's creator and commander, Hugo Eckener, the book is both a romantic travel adventure and the story of a great scientific achievement.

The Hindenburg in Flames Michael

Burgan,2016-08 Discusses the iconic photograph of the German airship Hindenburg in flames as it attempted to land in New Jersey in May 1937.

Hindenburg Disaster Jill Sherman,2010-01-01

This title examines an important historic event, the Hindenburg Disaster. Readers will learn the background of airships, Germany's Count Zeppelin's push to build airships, and the planning, building, and tragic explosion of the Hindenburg. Also covered are the key players, the investigation of the disaster, and the event's impact on future airship developments. Color photos and informative sidebars accompany easy-to-read compelling text. Features include a timeline, facts, additional resources, Web sites, a glossary, a bibliography, and an index.

Essential Events is a series in Essential Library, an imprint of ABDO Publishing Company. *Zeppelins*, Empires of the Sky Alexander Rose,2020-04-28 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that

once roamed the sky a story that ended with the fiery destruction of the Hindenburg Genius a definitive tale of an incredible time when mere mortals learned to fly Keith O'Brien The New York Times At the dawn of the twentieth century when human flight was still considered an impossibility Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine As the Wrights labored to invent the airplane Zeppelin fathered the remarkable airship sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades in the quest to control one of humanity's most inspiring achievements And it was the airship not the airplane that led the way In the glittery 1920s the count's brilliant protégé Hugo Eckener achieved undreamed-of feats of daring and skill including the extraordinary Round the World voyage of the Graf Zeppelin At a time when America's airplanes rickety deathtraps held together by glue screws and luck could barely make it from New York to Washington D.C. Eckener's airships serenely traversed oceans without a single crash fatality or injury What Charles Lindbergh almost died doing crossing the Atlantic in 1927 Eckener had effortlessly accomplished three years before the Spirit of St. Louis even took off Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes Eckener built his masterwork the behemoth Hindenburg a marvel of design and engineering Determined to forge an airline empire under the new flagship Eckener met his match in Juan Trippe the ruthlessly ambitious king of Pan American Airways who believed his fleet of next-generation planes would vanquish Eckener's coming airship armada It was a fight only one man and one technology could win Countering each other's moves on the global chessboard each seeking to wrest the advantage from his rival the struggle for mastery of the air was a clash not only of technologies but of business diplomacy politics personalities and the two men's vastly different dreams of the future Empires of the Sky is the sweeping untold tale of the duel that transfixed the world and helped create our modern age
