Between Two Nations:

Between Two Nations Michael Jones-Correa, 2018-09-05 Immigrants come to the United States from all over Latin America in search of better lives They obtain residency status find jobs pay taxes and they have children who are American citizens by birth yet decades may go by before they seek citizenship for themselves or become active participants in the American political process *Between Two Nations* examines the lack of political participation among Latin American immigrants in the United States to determine why so many remain outside the electoral process Michael Jones Correa studied the political practices of first generation immigrants in New York City's multiethnic borough of Queens Through intensive interviews and participant observation he found that immigrant participation was stymied both by lack of encouragement to participate and by the requirement to renounce former citizenship which raised the fear of never being able to return to the country of origin The hesitation to naturalize as American citizens can extend over decades leaving immigrants adrift in a political limbo *Between Two Nations* is the first qualitative study of how new immigrants assimilate into American political life Jones Correa reexamines assumptions about Latino politics and the diversity of Latino populations in the United States about the role of informal politics in immigrant communities and about gender differences in approaches to political activity

Two Nations Andrew Hacker, 2010-05-11 In this groundbreaking study Andrew Hacker offers a fresh and disturbing examination of the divisions of color and class in present day America analyzing the conditions that keep black and white Americans dangerously far apart in their ability to achieve the American dream Why despite continued efforts to increase understanding and expand opportunities do black and white Americans still lead separate lives continually marked by tension and hostility In his much lauded classic and updated version reflecting the changing realities of race in our nation Andrew Hacker explains the origins and meaning of racism and clarifies the conflicting theories of equality and inferiority He paints a stark picture of racial inequality in America focusing on family life education income and employment and explores the controversies over politics crime and the causes of the gap between the races Reasoned accurate and devastating *Two Nations* demonstrates how this great and dividing issue has defined America's history and the pivotal role it will play in the future

British-American Relations James Davenport Whelpley, 1924 [Mapping the Nation](#) Gopal Balakrishnan, 1996 Few political phenomena have proved as confusing or as difficult to comprehend as nationalism There is no established consensus on its identity genesis or future Are we for example in the process of being thrust back into a nineteenth century world of competitive and aggressive great powers and petty nationalisms Or rather are we being flung headlong into a new globalized and supra national millennium Has the nation state outlived its usefulness and exhausted its progressive and emancipatory role or has nationalism always been implicated in an exclusivist ethnic and militaristic logic *Mapping the Nation* seeks to address these and other questions about the nature and destiny of the national question in the present epoch A comprehensive and definitive reader on the subject with contributions from some of the most significant and stimulating

theorists of the nation state it presents a wide range of divergent ideas and controversies Leading off with powerful statements of the classic liberal and socialist positions by Lord Acton and Otto Bauer there then follows an historical sociological debate between the late Ernest Gellner and the Czech historian Miroslav Hroch the one stressing the connections between nationalism and the transition away from agrarian society the other emphasizing its variability and real anthropological basis John Breuilly and Anthony D Smith two of the leading British specialists provide a counterpoint to each other with considerations on the respective importance of political leadership and continuing ethnic communities in the construction of nationalist movements Gopal Balakrishnan in a carefully honed critique of Benedict Anderson s seminal *Imagined Communities* and Partha Chatterjee from the Subaltern Studies circle offer crucial insights on the limitations of the Enlightenment approach to nationhood as do Sylvia Walby and Katherine Verdery with their reflections on the entanglements of nation gender and identity politics Sociologist Michael Mann delivers an authoritative refutation of the chatter about the death of the nation state Finally relating the theoretical questions directly to the politics of our time renowned historian Eric Hobsbawm provocative theorist Tom Nairn and the outstanding political philosopher Jürgen Habermas discuss with varying degrees of optimism and pessimism the future of the national project
