Considered Judgment:

Considered Judgment Catherine Z. Elgin, 1999-02-01 Philosophy long sought to set knowledge on a firm foundation through derivation of indubitable truths by infallible rules For want of such truths and rules the enterprise foundered Nevertheless foundationalism's heirs continue their forbears quest seeking security against epistemic misfortune while their detractors typically espouse unbridled coherentism or facile relativism Maintaining that neither stance is tenable Catherine Elgin devises a via media between the absolute and the arbitrary reconceiving the nature goals and methods of epistemology In Considered Judgment she argues for a reconception that takes reflective equilibrium as the standard of rational acceptability A system of thought is in reflective equilibrium when its components are reasonable in light of one another and the account they comprise is reasonable in light of our antecedent convictions about the subject it concerns Many epistemologists now concede that certainty is a chimerical goal But they continue to accept the traditional conception of epistemology's problematic Elgin suggests that in abandoning the quest for certainty we gain opportunities for a broader epistemological purview one that comprehends the arts and does justice to the sciences She contends that metaphor fiction emotion and exemplification often advance understanding in science as well as in art The range of epistemology is broader and more variegated than is usually recognized Tenable systems of thought are neither absolute nor arbitrary Although they afford no guarantees they are good in the way of belief

Justice and Justification Norman Daniels, 1996-09-28 We all have beliefs even strong convictions about what is just and fair in our social arrangements How should these beliefs and the theories of justice that incorporate them guide our thinking about practical matters of justice This wide ranging collection of essays by one of the foremost medical ethicists in the United States explores the claim that justification in ethics whether concerning matters of theory or practice involves achieving coherence or reflective equilibrium as Rawls has called it between our moral and nonmoral beliefs Among the practical issues the volume addresses are the design of health care institutions the distribution of goods between the old and the young and fairness in hiring and firing practices In combining ethical theory and practical ethics this volume will prove especially valuable to philosophers concerned with ethics and applied ethics political theorists bioethicists and others involved in the study of public policy

Judgments of Beauty in Theory Evaluation Devon

Brickhouse-Bryson, 2020-07-01 In Judgments of Beauty in Theory Evaluation Devon Brickhouse Bryson argues that judgments of beauty are a justified part of theory evaluation of all sorts including both scientific theory evaluation and philosophical theory evaluation He supports this argument with an account of beauty inherited from Kant and Mothersill on which the distinctive nature of judgments of beauty is that they are unprincipled yet possible Brickhouse Bryson analyzes two important methods of theory evaluation reflective equilibrium and simplicity and argues that these methods require making judgments of beauty understood He further argues that these methods of theory evaluation are not anomalies but that they point to a

deeper lesson about the nature of theorizing and the necessity of using judgments of beauty to evaluate systems like theories This book has implications for the debate in philosophy of science over judgments of beauty and also prompts a reckoning in philosophy itself over the use of judgments of beauty in philosophical theory evaluation Philosophical Perspectives on Bioethics Joseph Boyle, Leonard W.
