

Constraint-based Scheduling

- A typical scheduling system allocates WorkForce to WorkLoad satisfying real-world Constraints and business Objectives
- Scheduling Engines - the software tools that allow a human scheduler to build an optimal schedule

Constraint Based Scheduling

Pascal Van Hentenryck, Laurent Michel

Constraint Based Scheduling:

Constraint-Based Scheduling Philippe Baptiste, Claude Le Pape, Wim Nuijten, 2012-12-06 Constraint Programming is a problem solving paradigm that establishes a clear distinction between two pivotal aspects of a problem 1 a precise definition of the constraints that define the problem to be solved and 2 the algorithms and heuristics enabling the selection of decisions to solve the problem It is because of these capabilities that Constraint Programming is increasingly being employed as a problem solving tool to solve scheduling problems Hence the development of Constraint Based Scheduling as a field of study The aim of this book is to provide an overview of the most widely used Constraint Based Scheduling techniques Following the principles of Constraint Programming the book consists of three distinct parts The first chapter introduces the basic principles of Constraint Programming and provides a model of the constraints that are the most often encountered in scheduling problems Chapters 2 3 4 and 5 are focused on the propagation of resource constraints which usually are responsible for the hardness of the scheduling problem Chapters 6 7 and 8 are dedicated to the resolution of several scheduling problems These examples illustrate the use and the practical efficiency of the constraint propagation methods of the previous chapters They also show that besides constraint propagation the exploration of the search space must be carefully designed taking into account specific properties of the considered problem e g dominance relations symmetries possible use of decomposition rules Chapter 9 mentions various extensions of the model and presents promising research directions

Constraint-Based Scheduling National Aeronautics and Space Administration (NASA), 2018-08-16 The GERRY scheduling system developed by NASA Ames with assistance from the Lockheed Space Operations Company and the Lockheed Artificial Intelligence Center uses a method called constraint based iterative repair Using this technique one encodes both hard rules and preference criteria into data structures called constraints GERRY repeatedly attempts to improve schedules by seeking repairs for violated constraints The system provides a general scheduling framework which is being tested on two NASA applications The larger of the two is the Space Shuttle Ground Processing problem which entails the scheduling of all inspection repair and maintenance tasks required to prepare the orbiter for flight The other application involves power allocations for the NASA Ames wind tunnels Here the system will be used to schedule wind tunnel tests with the goal of minimizing power costs In this paper we describe the GERRY system and its applications to the Space Shuttle problem We also speculate as to how the system would be used for manufacturing transportation and military problems

Handbook of Constraint Programming Francesca Rossi, Peter van Beek, Toby Walsh, 2006-08-18 Constraint programming is a powerful paradigm for solving combinatorial search problems that draws on a wide range of techniques from artificial intelligence computer science databases programming languages and operations research Constraint programming is currently applied with success to many domains such as scheduling planning vehicle routing configuration networks and bioinformatics The aim of this

handbook is to capture the full breadth and depth of the constraint programming field and to be encyclopedic in its scope and coverage. While there are several excellent books on constraint programming, such books necessarily focus on the main notions and techniques and cannot cover also extensions, applications, and languages. The handbook gives a reasonably complete coverage of all these lines of work based on constraint programming so that a reader can have a rather precise idea of the whole field and its potential. Of course, each line of work is dealt with in a survey-like style where some details may be neglected in favor of coverage. However, the extensive bibliography of each chapter will help the interested readers to find suitable sources for the missing details. Each chapter of the handbook is intended to be a self-contained survey of a topic and is written by one or more authors who are leading researchers in the area. The intended audience of the handbook is researchers, graduate students, higher year undergraduates, and practitioners who wish to learn about the state of the art in constraint programming. No prior knowledge about the field is necessary to be able to read the chapters and gather useful knowledge. Researchers from other fields should find in this handbook an effective way to learn about constraint programming and to possibly use some of the constraint programming concepts and techniques in their work, thus providing a means for a fruitful cross-fertilization among different research areas. The handbook is organized in two parts. The first part covers the basic foundations of constraint programming, including the history, the notion of constraint propagation, basic search methods, global constraints, tractability, and computational complexity, and important issues in modeling a problem as a constraint problem. The second part covers constraint languages and solvers, several useful extensions to the basic framework, such as interval constraints, structured domains, and distributed CSPs, and successful application areas for constraint programming. Covers the whole field of constraint programming. Survey style chapters. Five chapters on applications.

Using a constraint-based scheduling library to solve a specific scheduling problem Claude Le Pape, 1994

Constraint-based Scheduling, 1991 *Designing the Framework of a Constraint-based Scheduling Software System for Operations Management* Jing Tan, Thayer School of Engineering, 2007 *Constraint-Based Scheduling in an Intelligent Logistics Support System: An Artificial Intelligence Approach* M. S. Fox, S. F. Smith, CARNEGIE-MELLON UNIV PITTSBURGH PA ROBOTICS INST., 1985. This report summarizes the progress of research performed under AFOSR contract Number F49620 82 K 0017 titled Constraint Based Scheduling in an Intelligent Logistics Support System. An Artificial Intelligence Approach. During the contract renewal period from March 1984 to March 1985, the continued development of a theory of hierarchical opportunistic constraint directed reasoning for job shop scheduling has been the focus of our research. Specifically, we have conducted work in the areas of opportunistic exploitation of constraints and constraint directed diagnosis. The former has led us to the use of multiple problem decompositions during schedule generation, while the latter has evolved toward development of a more broad-based framework for reactive scheduling. An experimental software system called ISIS has continued its evolution, and additional testing with simulated plant data has been performed. The design of a

successor system called PHOENIX has been initiated Author *Constraint-based Local Search* Pascal Van Hentenryck, Laurent Michel, 2005 The ubiquity of combinatorial optimization problems in our society is illustrated by the novel application areas for optimization technology which range from supply chain management to sports tournament scheduling Over the last two decades constraint programming has emerged as a fundamental methodology to solve a variety of combinatorial problems and rich constraint programming languages have been developed for expressing and combining constraints and specifying search procedures at a high level of abstraction Local search approaches to combinatorial optimization are able to isolate optimal or near optimal solutions within reasonable time constraints This book introduces a method for solving combinatorial optimization problems that combines constraint programming and local search using constraints to describe and control local search and a programming language COMET that supports both modeling and search abstractions in the spirit of constraint programming After an overview of local search including neighborhoods heuristics and metaheuristics the book presents the architecture and modeling and search components of constraint based local search and describes how constraint based local search is supported in COMET The book describes a variety of applications arranged by meta heuristics It presents scheduling applications along with the background necessary to understand these challenging problems The book also includes a number of satisfiability problems illustrating the ability of constraint based local search approaches to cope with both satisfiability and optimization problems in a uniform fashion

Principles and Practice of Constraint Programming, 2005 **A Genetic Algorithm-based Scheduling System for Dynamic Job Shop Scheduling Problems** Shyh-Chang Lin, 1997 *Improving Constraint-based Scheduling with Look Ahead Techniques* Michelle Lyn Edwards, 1997 **Using Constraint-based Heuristics to Satisfice Static Software Partitioning and Allocation of Heterogeneous Distributed Systems** Elizabeth Marie Sisley, 1999 **Integrating Constraint Programming, Artificial Intelligence, and Operations Research** Torsten Fahle, 2002 **Using Constraints to Render Websites** Lars Kotthoff, 2008-02 Diploma Thesis from the year 2007 in the subject Computer Science Theory grade 1 0 University of Leipzig language English abstract Constraint programming is an area of Artificial Intelligence which has many applications This thesis applies its techniques to a new kind of problem the rendering of online retailer websites First in depth introductions to constraint programming and the problem of rendering a shop website will be given A prototypical implementation of a constraint problem solver and a system to solve and illustrate the problem will be described The architecture of the prototypical implementation and specific features algorithms and design decisions will be detailed analysed and illustrated An overview of related work both in the fields of constraint programming and website generation will be presented and existing technologies evaluated Features and concepts unique to this thesis like real time constraint satisfaction will be introduced and discussed Finally a comprehensive example will illustrate the problem means of modelling it and possible solutions An outlook to future work and a summary conclude the thesis Constraint Programming ist

ein Teilgebiet der künstlichen Intelligenz mit vielen praktischen Anwendungen Diese Diplomarbeit wendet die Techniken auf eine neue Art von Problem an das Rendern von Webseiten von Internetshops Zuerst wird eine detaillierte Einführung zu Constraint Programming und dem Problem die Webseite eines Online Shops zu rendern gegeben werden Eine Beispielimplementierung eines Constraint Problem Solvers und eines Systems um das Problem zu lösen und illustrieren werden beschrieben werden Die Architektur der Beispielimplementierung und spezielle Eigenschaften Algorithmen und Implementierungsentscheidungen werden genau beschrieben analysiert und illustriert werden Ein Überblick von ähnlichen Arbeiten sowohl im Bereich des Constraint Programming als auch im Bereich des Generierens von Webseiten

A
Constraint-based Method for Project Scheduling with Time Windows Amedeo Cesta, Angelo Oddi, Stephen F. Smith, 2000 Abstract This paper presents a heuristic algorithm for solving RCPSP max the resource constrained project scheduling problem with generalized precedence relations The algorithm relies at its core on a constraint satisfaction problem solving CSP search procedure which generates a consistent set of activity start times by incrementally removing resource conflicts from an otherwise temporally feasible solution Key to the effectiveness of the CSP search procedure is its heuristic strategy for conflict selection A conflict sampling method biased toward selection of minimal conflict sets that involve activities with higher capacity requests is introduced and coupled with a non deterministic choice heuristic to guide the base conflict resolution process This CSP search is then embedded within a larger iterative sampling search framework to broaden search space coverage and promote solution optimization The efficacy of the overall heuristic algorithm is demonstrated empirically on a large set of previously studied RCPSP max benchmark problems Planning and Scheduling Research at NASA Ames Research Center ,1990 New Trends in Constraints ,1999 **Integrating Constraint Programming, Artificial Intelligence, and Operations Research (CP-AI-OR)** ,2003 **Scheduling** Chung-Yee Lee, Lei Lei, 1997 **ETFA '96** ,1996

When people should go to the books stores, search commencement by shop, shelf by shelf, it is in reality problematic. This is why we provide the books compilations in this website. It will definitely ease you to look guide **Constraint Based Scheduling** as you such as.

By searching the title, publisher, or authors of guide you in fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best area within net connections. If you intention to download and install the Constraint Based Scheduling, it is categorically easy then, in the past currently we extend the join to purchase and create bargains to download and install Constraint Based Scheduling appropriately simple!

Constraint Based Scheduling Introduction

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Constraint Based Scheduling PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing

financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Constraint Based Scheduling PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Constraint Based Scheduling free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.

FAQs About Constraint Based Scheduling Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Constraint Based Scheduling is one of the best book in our library for free trial. We provide copy of Constraint Based Scheduling in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Constraint Based Scheduling. Where to download Constraint Based Scheduling online for free? Are you looking for Constraint Based Scheduling PDF? This is definitely going to save you time and cash in something you should think about.
