building applications that are standards compliant has become a much easier and more necessary part of the development on Linux as a platform Jeffrey Hemos Bates Editor Slashdot org In the days before the LSB every change and every improvement we wanted to make to our Linux product was subject to somebody saying But wait I depend on that The LSB laid out what interfaces were defined and how they should be used Since the LSB was adopted we have been free to innovate without fear of breaking somebody else s assumptions The success of the LSB recommended it as the starting point for the U S Department of Defense s Common Operating Environment COE specification for Linux Without the LSB there would be no COE certified Red Hat products today Michael Tiemann Chief Technology Officer Red Hat Inc As an active LSB member SUSE LINUX is committed both to providing customers with standardized Linux technology and to simplifying ISV s and IHV s Linux certification efforts The availability of common standards plays a decisive role in the proliferation of Linux operating systems and applications on server and client systems worldwide and we appreciate the LSB project s work in developing and promoting these standards Markus Rex General Manager of SUSE LINUX for Novell We are very happy to see the progress of LSB both in the definition of the standard and in its broad support LSB is an important part of our strategy and MandrakeSoft will continue to support the efforts of LSB to define a standardized ABI and encourage ISVs to build and certify to this standard Francois Bancilhon Chief Executive Officer MandrakeSoft The launch of the LSB is a significant development for the Linux community For the very first time in history a common binary computing environment will be able to be shared across different systems from different vendors The LSB will play a pivotal role in ensuring the proper development of the Linux market Sun Wah Linux is excited about this phenomenon and is dedicated to supporting LSB s future efforts and endeavors Alex Banh Chief Executive Officer Sun Wah Linux P R C An initiative of the Free Standards Group the Linux Standard Base LSB is a set of standards designed to increase compatibility among Linux distributions and enable applications to run on any LSB compliant system The advent of LSB 2 0 is revolutionary in that it allows ISVs to create shrink wrapped software for the Linux platform much in the same way they already do for Windows Written by the team that created the LSB Building Applications with the Linux Standard Base shows developers how to create test and certify software for LSB 2 0 compliance The book s hands on approach lets readers quickly understand how to write Linux applications that are portable across multiple distributions including those from SuSE Mandrake and Solaris The accompanying CD ROM contains the full LSB 2 0 specification and the sample program files used in the book Coverage includes LSB coding practices Software packing and installation issues UNIX to Linux migration tips Testing Linux distribution and applications for LSB compatibility Examples of applications using the LSB Relevant standards for Linux

Autonomic Computing Richard Murch, 2004 This book introduces Autonomic Computing This concept is a cornerstone of IBM s strategic initiative and it offers great promise because autonomic computing systems have the ability to manage themselves and dynamically adapt to change in accordance with evolving or dynamic business policies and objectives The term autonomic comes from the

autonomic nervous system which controls many organs and muscles in the human body These systems can perform management activities based on situations they observe or sense in the IT environment Rather than IT professionals initiating management activities the system observes something about itself and acts accordingly This allows the IT professional to focus on high value tasks while the technology manages the more mundane operations This book explains how this can be made to happen and the changes that need to be made to make it happen
