Discourse Function And Syntactic Form In Natural Language Generation:

Discourse Function & Syntactic Form in Natural Language Generation Cassandre Creswell,2004-12-24 Interest in statistical natural language generation is rapidly increasing This work sheds important light from theoretical linguistics on the type of information crucial to statistical NLG algorithms

Syntactic Form and Discourse Function in Natural Language Generation Cassandre Creswell,2004-12-24 Users of natural languages have many word orders with which to encode the same truth conditional meaning They choose contextually appropriate strings from these many ways with little conscious effort and with effective communicative results Previous computational models of when English speakers produce non canonical word orders like topicalization left dislocation and clefts fail The primary goal of this book is to present a better model of when speakers choose to produce certain non canonical word orders by incorporating the effects of discourse context and speaker goals on syntactic choice This book makes extensive use of previously unexamined naturally occurring corpus data of non canonical word order in English both to illustrate the points of the theoretical model and to train the statistical model

Structural Markedness and Syntactic Structure Rodrigo Gutiérrez-Bravo,2013-10-15 This book investigates a number of word order phenomena in Spanish concentrating on this language s unmarked word order and the perturbations of this order that result from topicalization and wh movement

The Syntax of Negation and the Licensing of Negative Polarity Items in Hindi Rajesh Kumar,2013-10-15 This books studies syntax of NPIs and their interaction with sentential negatives in Hindi It outlines the clause structure of Hindi and locates the syntactic position of sentential negatives as well as constituent negatives within the structure It is argued that sentential negative in Hindi negation marker heads its own maximal projection NegP which is immediately dominated by TP In addition to locating the position of negation markers in the clause structure it outlines the distribution of negative polarity items NPIs in Hindi and the structural constraints on their licensing by sentential negative The book argues that an NPI in Hindi is licensed overtly in the course of derivation by a c commanding negative marker The bulk of the evidence presented in this book argues against previous theoretical accounts that claim that NPI licensing involves covert syntactic operations such as LF movement or reconstruction With respect to the classification of NPIs this book also shows the existence of two different types of NPIs in Hindi namely strong NPIs and weak NPIs Strong NPIs require a clause mate c commanding negative licenser whereas weak NPIs are quantifiers and are similar to free choice any in English that are interpreted as NPIs in the presence of a c commanding negative licenser

Challenging Change Biljana Mišić Ilić,Vesna Lopičić,2012-04-25 This book *Challenging Change Literary and Linguistic Responses* is a collection of twenty three articles which examine change understood in the broadest sense as the need of the modern man to redefine revise deconstruct and reconstruct previous theories histories moralities social relationships forms of language and language use In these times of great change when the only constant seems to be change itself the authors of these essays respond to the challenge and approach the notion of change from the

perspectives of literary studies and linguistics The book opens with an introductory overview followed by twenty three articles divided into two sections The authors of the articles come from Serbia Bosnia and Herzegovina Romania the United States Canada Japan and Norway

Advances in Natural Language Generation Michael Zock, Gerard Sabah,1988 This collection of essays deals with the problem of natural language generation that is how to simulate by computer the determinism organization and expression of thoughts in oral or written form Compared to sentence or text analysis parsing little work has been done in the field of generation which is still a young discipline

A Flexible, Parallel Model of Natural Language Generation Nigel Ward,1991 FIG suggests that the complexity present in most treatments of syntax is unnecessary For example it does not assemble or manipulate syntactic structures constructions affect the utterance only by the activation they transmit directly or indirectly to words Unlike previous generators FIG handles arbitrarily large inputs since the number of nodes activated in the initial state makes no difference to its operation it handles trade offs among competing goals without additional mechanism since all computation is in terms of commensurate levels of activation and it handles interaction among choices easily since it tends to settle into a state representing a compatible set of choices due to links among nodes representing such choices

The Production of Spoken Discourse George Houghton,1997 This volume focuses on spoken language and its production It is part of a series which provides a forum for the cross fertilization of ideas from diverse disciplines that share a mutual interest in discourse A variety of approaches to the topic are represented sociolinguistics psycholinguistics ethnomethodology and the study of language educational psychology and computational linguistics

Text and Context Claire J. Kramsch, Sally McConnell-Ginet,1992 The papers in this volume stemming from the Fourth Annual conference of the Consortium for Language Teaching and Learning explore the relationships between form and meaning in language use
