4D Time Lock Richard Buckminster Fuller, 1930 **New Views on R. Buckminster Fuller** Hsiao-yun Chu, Roberto G. Trujillo, 2009 In this book leading scholars in architecture design history and communications discuss the work of R Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century Chicago Makes Modern Mary Jane Jacob, Jacquelynn Baas, 2012-12-15 Chicago is a city dedicated to the modern from the skyscrapers that punctuate its skyline to the spirited style that inflects many of its dwellings and institutions from the New Bauhaus to Hull House Despite this the city has long been overlooked as a locus for modernism in the arts its rich tradition of architecture design and education disregarded Still the modern in Chicago continues to thrive as new generations of artists incorporate its legacy into fresh visions for the future Chicago Makes Modern boldly remaps twentieth century modernism from our new century perspective by asking an imperative question How did the modern mind deeply reflective yet simultaneously directed help to dramatically alter our perspectives on the world and make it new Returning the city to its rightful position at the heart of a multidimensional movement that changed the face of the twentieth century Chicago Makes Modern applies the missions of a brilliant group of innovators to our own time From the radical social and artistic perspectives implemented by Jane Addams John Dewey and Buckminster Fuller to the avant garde designs of L szl Moholy Nagy and Mies van der Rohe the prodigious offerings of Chicago s modern minds left an indelible legacy for future generations Staging the city as a laboratory for some of our most heralded cultural experiments Chicago Makes Modern reimagines the modern as a space of self realization and social progress where individual visions triggered profound change Featuring contributions from an acclaimed roster of contemporary artists critics and scholars this book demonstrates how and why the Windy City continues to drive the modern world The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in

physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak
