**Animal Weapons** Douglas J. Emlen, 2014-11-11 WINNER OF THE PHI BETA KAPPA AWARD IN SCIENCE The story behind the stunning extreme weapons we see in the animal world teeth and horns and claws and what they can tell us about the way humans develop and use arms and other weapons In *Animal Weapons* Doug Emlen takes us outside the lab and deep into the forests and jungles where he's been studying animal weapons in nature for years to explain the processes behind the most intriguing and curious examples of extreme animal weapons fish with mouths larger than their bodies and bugs whose heads are so packed with muscle they don't have room for eyes As singular and strange as some of the weapons we encounter on these pages are we learn that similar factors set their evolution in motion Emlen uses these patterns to draw parallels to the way we humans develop and employ our own weapons and have since battle began He looks at everything from our armor and camouflage to the evolution of the rifle and the structures human populations have built across different regions and eras to protect their homes and communities With stunning black and white drawings and gorgeous color illustrations of these concepts at work *Animal Weapons* brings us the complete story of how weapons reach their most outsized dramatic potential and what the results we witness in the animal world can tell us about our own relationship with weapons of all kinds
