Animals In Their Homes:

Animals in Their Homes Sonia Goldie, 2006 A gorgeously illustrated book two fold out posters four sheets of stickers and a puzzle will all entice children to come along on a wildlife expedition into the dwellings of various creatures Thanks to the beautifully rendered paintings kids will be able to visit and take a close look at animal homes that lie deep underground up high in the trees and by the river s edge Travel through the mole s labyrinth like tunnels and dig into the rabbit s burrow Snuggle into the fox s cozy den and climb into birds and squirrels nests Wander along the water s edge to find a beaver s lodge or otter s bed and watch turtle hermit crab and snail carry their homes wherever they go The stickers and other cool activities keep the fun going *Find Out About Animal Homes* Martin Jenkins, 2022-04-26 Discover some of the many types of animal homes in this engaging introduction for young children from a conservation biologist Some animals make houses out of sticks storks will return to their large twiggy nests year after year Others build them out of stones young caddis flies carry their pebbly homes wherever they go And some like edible nest swiftlets craft houses out of spit Many animals have homes but not all animal homes are the same From honeybees with neat precise hives to pack rats with messy nests from prairie dogs whose underground towns last for decades to orangutans who make a new home every day the range of dwellings depicted here shows how much animals behavior can vary even in their own homes Melding a simple narration with more detailed facts on such animals as beavers spiders polar bears termites and reindeer this appealing picture book also offers a brief note on animals and their homes in the back matter **Animals: their homes, haunts, habits, characteristics and uses** Animals, 1896 *Home Ranges of Animals* Roger A. Powell, 2025-10-21 Animals have tremendous agency to understand the world around them and to plan how to take best advantage of that world to meet their requirements Their perception of the world differs from humans and includes knowledge emphasizing different senses This book argues that to understand animals home ranges which are integral to the behavior and ecology of animals biologists must understand their cognition of their environments Presenting diverse complementary approaches to studying home ranges this book shows how using multiple approaches sheds a broad light on how and why animals behave as they do The book also provides many examples showing how hypothesis driven research provides strong insights into animal behavior and ecology Animal Homes Mary Holland, 2020 Just like humans animals use their homes for shelter and to raise their young Animal homes might be easy to see or they may be hidden camouflaged for protection Some animals are great builders and other animals borrow homes that other animals have made Different animals might just use natural places like caves or holes in trees to make a home And some animals might even carry their home on their back Sticks mud leaves cotton and grass are all things that animals might use to build a home Whether by digging spinning building or borrowing animal homes are as varied as the animals themselves This is a perfect sequel to Mary Holland s *Animal Anatomy and Adaptations* series *Animal Homes* Anita Ganeri, 1997 Describes the natural habitats of animals throughout the world and how these animals
