Animals, Political Liberalism and Public Reason Federico Zuolo, 2020-07-17 This book explores the problem of disagreement concerning the treatment of animals in a liberal society Current laws include an unprecedented concern for animal welfare yet disagreement remains pervasive This issue has so far been neglected both in political philosophy and animal ethics Although starting from disagreement has been the hallmark of many politically liberal theories none have been devoted to the treatment of animals and conversely most theories in animal ethics do not take the disagreement on this issue seriously Bridging this divide with a change of perspective Zuolo argues that we should begin from the disagreement on the moral status of animals and the treatment we owe them Reconstructing the epistemic nature of disagreement about animals Zuolo proposes a novel form of public justification to find principles acceptable to all By setting out a unified framework which honours the liberal principles of respect for diversity a robust liberal political theory capable of dealing with diverse forms of disagreement and even some forms of radical dissent is achieved

Persons, Animals, and Fetuses M.G. Forrester, 2012-12-06 Forrester discusses animal rights obligations concerning future generations abortion limiting medical treatment and euthanasia Persons are defined as individuals who ought to be treated in accordance with all sound moral principles The author develops an account of what moral principles are sound how we can apply them to complex situations and what makes it reasonable to treat individuals in accordance with particular moral principles This discussion puts the book s practical conclusions on a sounder basis than much other work on practical ethics Most such authors state some general principles but say little about why these principles should be accepted Moreover they rarely show how general principles can generate answers to specific dilemmas Some even maintain that general principles are irrelevant Since Forrester is both a nurse practitioner and a philosopher she has had direct acquaintance with many agonizing situations in medicine Summaries of the theoretical conclusions are included to enable nonprofessionals to follow the discussion of practical issues The book will thus interest not only professional philosophers but also non philosophers concerned with problems in medical and environmental ethics abortion and animal rights
