Producing Animation Catherine Winder, Zahra Dowlatabadi, 2001. Students, aspiring producers, investors, television and studio executives, artists, film line producers wishing to branch into animation, and legal advisors will find this an invaluable tool. The chapters specifically geared to the pre-production, production, and postproduction processes offer animation producers a wealth of practical advice. Numerous illustrations outline the different steps of production. Forms the authors have devised to help streamline the process are also included. Observations from a wide range of industry professionals such as studio heads, creators, directors, producers, writers, and members of the production crew give the reader insight into what it takes to be successful in this business. The authors' personal anecdotes at key process checkpoints relay firsthand experience, illustrating some of the pitfalls a producer must learn to circumvent.
