Digital Cities II:

Handbook of Ambient Intelligence and Smart Environments Hideyuki Nakashima, Hamid Aghajan, Juan Carlos Augusto, 2009-10-01 Our homes anticipate when we want to wake up Our computers predict what music we want to buy Our cars adapt to the way we drive In today's world even washing machines rice cookers and toys have the capability of autonomous decision making As we grow accustomed to computing power embedded in our surroundings it becomes clear that these smart environments with a number of devices controlled by a coordinating system capable of ambient intelligence will play an ever larger role in our lives This handbook provides readers with comprehensive up to date coverage in what is a key technological field Systematically dealing with each aspect of ambient intelligence and smart environments the text covers everything from visual information capture and human computer interaction to multi agent systems network use of sensor data and building more rationality into artificial systems The book also details a wide range of applications examines case studies of recent major projects from around the world and analyzes both the likely impact of the technology on our lives and its ethical implications With a wide variety of separate disciplines all conducting research relevant to this field this handbook encourages collaboration between disparate researchers by setting out the fundamental concepts from each area that are relevant to ambient intelligence and smart environments providing a fertile soil in which ground breaking new work can develop

Sustainable Interdependent Networks II M. Hadi Amini, Kianoosh G. Boroojeni, S. S. Iyengar, Panos M. Pardalos, Frede Blaabjerg, Asad M. Madni, 2018-12-11 This book paves the way for researchers working on the sustainable interdependent networks spread over the fields of computer science electrical engineering and smart infrastructures It provides the readers with a comprehensive insight to understand an in depth big picture of smart cities as a thorough example of interdependent large scale networks in both theory and application aspects The contributors specify the importance and position of the interdependent networks in the context of developing the sustainable smart cities and provide a comprehensive investigation of recently developed optimization methods for large scale networks There has been an emerging concern regarding the optimal operation of power and transportation networks In the second volume of Sustainable Interdependent Networks book we focus on the interdependencies of these two networks optimization methods to deal with the computational complexity of them and their role in future smart cities We further investigate other networks such as communication networks that indirectly affect the operation of power and transportation networks Our reliance on these networks as global platforms for sustainable development has led to the need for developing novel means to deal with arising issues The considerable scale of such networks due to the large number of buses in smart power grids and the increasing number of electric vehicles in transportation networks brings a large variety of computational complexity and optimization challenges Although the independent optimization of these networks lead to locally optimum operation points there is an exigent need to move towards obtaining the globally optimum operation point of such networks while satisfying

the constraints of each network properly The book is suitable for senior undergraduate students graduate students interested in research in multidisciplinary areas related to future sustainable networks and the researchers working in the related areas It also covers the application of interdependent networks which makes it a perfect source of study for audience out of academia to obtain a general insight of interdependent networks Digital Cities ... ,2003 Urban Development and Planning Bikram Pattanaik,2025-03-20 This book details the most contemporary concerns related to urban development governance and planning as well as the challenges to urban administration It analyses the policies and programmes adopted by both high income and lower middle income countries to achieve sustainable urbanization and their application and treatment to help students get a holistic practical perspective of the issues at hand This volume elucidates urban development theories and approaches coupled with urban planning local government finance urban management and urban governance It also discusses urban issues and challenges such as education health waste management land use planning housing and transport Critical concerns related to urban water bodies open spaces urban heritage and smart cities and urban future are similarly addressed This book will be useful to students researchers and teachers of urban planning and architecture urban sociology economics geography environmental science and public administration It shall also be useful to NGOs parastatal bodies and trainers of urban planning and development Planners policymakers functionaries and elected representatives of urban local bodies may also use this book as a capacity building instrument **CORP 2012 - Proceedings/Tagungsband** Manfred Schrenk,Peter Zeile,Vasily V.
