Hughes, 2012 A huge investment has been made in digitizing scholarly and cultural heritage materials through initiatives based in museums libraries and archives as well as higher education institutions The Digital Economy is an important component of institutional planning and much attention is given to the investment in digital projects and programmes However few initiatives have examined the actual use value and impact of digital collections and the role of digital collections in the changing information environment As the creative cultural and educational sector faces a period of restricted funding it is timely to re examine the use of the digital collections that have been created in the past twenty years and to consider their value to the institutions that host them and to the communities of users they serve This book brings together a group of international experts to consider the following key issues What is the role of digital resources in the research life cycle Do the arts and humanities face a data deluge How are digital collections to be sustained over the long term How is use and impact to be assessed What is the role of digital collections in the digital economy How is public engagement with digital cultural heritage materials to be assessed and supported This book will be of interest to academics librarians archivists and the staff of cultural heritage organizations as well as funders and other key stakeholders with an

Indian-made Erika Marie Bsumek,2008 In works of silver and wool the Navajos have established a unique brand of American craft And when their artisans were integrated into the American economy during the late nineteenth century they became part of a complex cultural and economic framework in which their handmade crafts conveyed meanings beyond simple adornment Bsumek unravels the layers of meaning that surround the branding of Indian made When Navajo artisans produced their goods collaborating traders tourist industry personnel and even ethnologists created a vision of Navajo

culture that had little to do with Navajos themselves And as Anglos consumed Navajo crafts they also consumed the romantic notion of Navajos as primitives perpetuated by the marketplace These processes of production and consumption reinforced each other creating a symbiotic relationship and influencing both mutual Anglo Navajo perceptions and the ways in which Navajos participated in the modern marketplace Ultimately Bsumek shows that the sale of Indian made goods cannot be explained solely through supply and demand It must also reckon with the multiple images and narratives that grew up around the goods themselves integrating consumer culture tourism and history to open new perspectives on our understanding of American Indian material culture
