Digitals In Broadcasting

Tadashi Shiomi, Mitsutoshi Hatori

Digitals In Broadcasting:

Digital Broadcasting Tadashi Shiomi, Mitsutoshi Hatori, 2000 Broadcast television began in Japan in 1953 Since then the presence of television has continued to grow and TV broadcasts are the most familiar source of information for most people This book compiles the fundamentals of digital broadcast which has developed since the advent of text caption broadcasting in 1985 it also looks at other advanced technology including terrestrial broadcast satellite broadcast and CATV cable television *Innovative Applications and Changing Framework in Digital Broadcasting* Bolat, Nursel, 2025-06-10 In conjunction with digitalization the media and publishing sector has undergone a radical transformation paving the way for new content production and consumption norms The traditional broadcasting approach is being replaced by more flexible accessible and user oriented models using the opportunities provided by technology Artificial intelligence supported algorithms offer personalized content recommendations while big data analytics enable a better understanding of user behavior and shape content strategies accordingly At the same time the proliferation of smart devices and the increase in high speed internet access have eliminated the physical boundaries of broadcasting and made it possible to reach a global audience *Innovative Applications and Changing Framework in Digital Broadcasting* examines in depth the impact of innovative practices in digital broadcasting on the sector and analyzes how these effects redefine the traditional framework of broadcasting In addition a comprehensive perspective on the future of digital broadcasting is presented by evaluating the opportunities and challenges in this framework shaped by new technologies Covering topics such as virtual universe narratives digital publishing ecosystems and binge watching this book is an excellent resource for producers authors broadcasters professionals researchers scholars academicians and more *Digital switchover of television and radio in the United Kingdom* Great Britain: Parliament: House of Lords: Select Committee on Communications, 2010-03-29 The Committee warns of a major public reaction against radio digital switchover scheduled for 2015 unless the Government make the case for switchover and keep the public informed about its impact There is public confusion and industry uncertainty over radio switchover and concern that due to the lack of public information people are still buying analogue radios which will be out of date in a few years time Retailers gave evidence stating that they are not getting adequate information on switchover plans so are unable to offer consumers accurate guidance when making purchases The report also points out that car manufacturers are still fitting analogue radios in new cars and digital radios will not be fitted as standard in all cars until 2013 The radio switchover is contrasted with the television switchover programme finding that the benefits of TV switchover were well understood in contrast surveys show that the public are generally happy with the present FM radio system and with the range of programmes that are provided The Committee recommends urgent steps on a range of actions including providing a detailed plan for universal digital radio coverage including how it is to be funded developing a policy for the long term use of FM devising a help scheme for radio switchover financed by general taxation rather than the BBC licence fee

ensuring new digital car radios are fitted with a multi standard chip to enable their use overseas encouraging radio manufacturers and retailers to devise a sensible scrappage scheme for redundant analogue radios It is also noted that the BBC and Government disagree over whether the cost of universal digital coverage of their national stations can be met under the current licence fee The report says that it is essential that a firm and unambiguous plan for funding the completion of build out of the digital radio service is put in place as soon as possible The report concludes reversing current policy would be unproductive given the amount of investment in digital radio already and while the switchover in 2015 is ambitious a change of target date is not favoured at this stage *Digitals in Broadcasting* Harold E. Digital Dilemma is the first comprehensive analysis of the United States digital radio transition chronicling the technological and policy development of the HD Radio broadcast standard A story laced with anxiety ignorance and hubris the evolution of HD Radio pitted the nation s largest commercial and public broadcasters against the rest of the radio industry and the listening public in a pitched battle over defining the digital future of the medium The Federal Communications Commission has elected to put its faith in marketplace forces to govern radio s digital transition but this has not been a winning strategy a dozen years from its rollout the state of HD Radio is one of dangerous malaise especially as newer digital audio distribution technologies fundamentally redefine the public identity of radio itself Ultimately Radio s Digital Dilemma is a cautionary tale about the overarching influence of economics on contemporary media policymaking to the detriment of notions such as public ownership and access to the airwaves and a call for media scholars and reformers to engage in the continuing struggle of radio s digital transition in hopes of reclaiming these important principles *Computer Science in Industrial Application*
