Difficult Decision Nightingale Series:

Difficult Decisions in Pediatric Surgery Mark B. Slidell, Marion C.W. Henry, 2025-03-27 Pediatric surgery is a demanding specialty that requires not only technical expertise but also exceptional clinical judgment and adaptability Pediatric surgeons frequently encounter rare congenital anomalies and unusual surgical problems often requiring them to make difficult decisions with limited precedent Even well recognized congenital conditions can present in atypical ways necessitating a patient centered approach that may deviate from routine practice This places a premium on a surgeon s ability to apply broad surgical principles to novel and complex situations tailoring interventions to each child s unique anatomy and pathology Compounding this challenge is the rapidly evolving literature in pediatric surgery where new techniques evolving guidelines and emerging technologies continually reshape best practices Thoughtful interpretation of the literature is essential particularly when the optimal approach to a problem remains unclear or controversial Pediatric surgeons must not only stay abreast of these developments but also critically analyze and synthesize data to make sound evidence based decisions in the face of uncertainty The Difficult Decisions in Surgery series was developed to address many of these challenges faced by surgeons To date 10 volumes have been published receiving enthusiastic engagement from the surgical community These multi authored volumes consist of concise chapters each focused on a specific difficult or controversial decision within a surgical specialty This series is particularly well suited for pediatric surgeons as it provides insight into difficult decisions faced within the field The volumes serve as a timely reference for practicing surgeons trainees and educators emphasizing the ideal approach to selected clinical situations rather than merely reflecting customary care Recommendations are grounded in published evidence while also incorporating expert opinions and personal experiences helping surgeons navigate complex evolving literature and apply general surgical principles to novel pediatric challenges The chapters in each volume adhere to a specific format This approach provides uniformity to the presentations making it possible to identify useful material at a glance a brief general introduction and description of the Difficult Decision laid out using PICO formatting a brief description of the literature search process a summary of available published evidence and discussion of the findings the author s personal view of the data and approach to the problem and why they do or don t do things found in the presented literature the chapter authors were selected from experts around the world the editors for this volume were selected from among internationally renown faculty at The University of Chicago and The Johns Hopkins University Books in Series, 1876-1949 R.R. Bowker Company, 1982 *All God's Mistakes* Charles L. Bosk, 1995-06 In one case after another Charles L Bosk reveals the process by which parents physicians and other health professionals come to guide decisions about pregnancies A story of both extraordinary drama and ordinary routine this is a pioneering case study of authority and control in a pediatric hospital showing how genetic counselors work with colleagues and with parents to be and how they deal with their powerlessness to control life and death decisions that they must address P.D.
