Diffident Naturalist:

The Diffident Naturalist Rose-Mary Sargent, 1995-02-01 In a provocative reassessment of one of the quintessential figures of early modern science Rose Mary Sargent explores Robert Boyle's philosophy of experiment a central aspect of his life and work that became a model for mid to late seventeenth century natural philosophers and for many who followed them Sargent examines the philosophical legal experimental and religious traditions among them English common law alchemy medicine and Christianity that played a part in shaping Boyle's experimental thought and practice The roots of his philosophy in his early life and education in his religious ideals and in the work of his predecessors particularly Bacon Descartes and Galileo are fully explored as are the possible influences of his social and intellectual circle Drawing on the full range of Boyle's published works as well as on his unpublished notebooks and manuscripts Sargent shows how these diverse influences were transformed and incorporated into Boyle's views on and practice of experiment *Religion, Reason and Nature in Early Modern Europe* Robert Crocker, 2001-10-31 From a variety of perspectives the essays presented here explore the profound interdependence of natural philosophy and rational religion in the long seventeenth century that begins with the burning of Bruno in 1600 and ends with the Enlightenment in the early Eighteenth century From the writings of Grotius on natural law and natural religion and the speculative libertin novels of Cyrano de Bergerac to the better known works of Descartes Malebranche Cudworth Leibniz Boyle Spinoza Newton and Locke an increasing emphasis was placed on the rational relationship between religious doctrine natural law and a personal divine providence While evidence for this intrinsic relationship was to be located in different places in the ideas already present in the mind in the observations and experiments of the natural philosophers and even in the history present experience and prophesied future of mankind the result enabled and shaped the broader intellectual and scientific discourses of the Enlightenment *Empiricisms* Barry Allen, 2021 *Empiricisms* is about the value of experience and experiments Why do we esteem them and what is their contribution to knowledge The work is unique in the detail with which it explains empiricism from its beginning in ancient medicine to its emergence as a philosophy of modern science It elucidates the ideas of the so called radical empiricists clarifying their relation to historical empiricism and explaining what is radical about them and develops a comparison between European empiricism and ideas and practice in traditional China Bringing China into the argument is an unexpected innovation and makes the work a model for comparative philosophy ***Making Knowledge in Early Modern Europe*** Pamela H. Smith, Benjamin Schmidt, 2007 Aims to bring together essays that explore how knowledge was obtained and demonstrated in Europe during an intellectually explosive four centuries when standard methods of inquiry took shape across several fields of intellectual pursuit This book looks at production and consumption of knowledge as a social process within different communities ***Beyond the Cultural Turn*** Victoria E. Bonnell, Lynn Hunt, 2023-04-28 Nothing has generated more controversy in the social sciences than the turn toward culture variously known as the linguistic turn

culturalism or postmodernism This book examines the impact of the cultural turn on two prominent social science disciplines history and sociology and proposes new directions in the theory and practice of historical research The editors provide an introduction analyzing the origins and implications of the cultural turn and its postmodernist critiques of knowledge Essays by leading historians and historical sociologists reflect on the uses of cultural theories and show both their promise and their limitations The afterword by Hayden White provides an assessment of the trend toward culturalism by one its most influential proponents Beyond the Cultural Turn offers fresh theoretical readings of the most persistent issues created by the cultural turn and provocative empirical studies focusing on diverse social practices the uses of narrative and the body and self as critical junctures where culture and society intersect Nothing has generated more controversy in the social sciences than the turn toward culture variously known as the linguistic turn culturalism or postmodernism This book examines the impact of the cultural turn on two prominent social science disciplines

Milton and the Natural World Karen L. Edwards, 2005-07-07 Milton and the Natural World overturns prevailing critical assumptions by offering a fresh view of Paradise Lost in which the representation of Eden's plants and animals is shown to be fully cognizant of the century's new scientific natural history The fabulous lore of the old science is wittily debunked and the poem embraces new imaginative and symbolic possibilities for depicting the natural world suggested by the speculations of Milton's scientific contemporaries including Robert Boyle Thomas Browne and John Evelyn Karen Edwards argues that Milton has represented the natural world in Paradise Lost with its flowers and trees insects and beasts as a text alive with meaning and worthy of close reading
